BROPRINT Brother equipment is far superior to all others. This was quick fix for my home office with SCAN, PRINT, FAX all in one. Compared to every other multi function piece of equipment, this one is Best Price and No Worry Office Set. Every bell and whistle needed. The Brother support live service CANNOT BE BEAT. I have owned dozens of these in my offices.Its quite reliable, easy to instal, toner is less expensive and print quality is excellent. Bennysp ProsConsOverall. I have been investigating laser allinones for a few weeks now.<http://cf-solutions.org/app/webroot/fckeditor/editor/filemanager/connectors/php/img/eltron-2746-e-service-manual.xml>

A few things were important to me. I wanted to be able to do duplex printing automatic, not manual, fast printing and network scanning that doesn't rely on PC software. This small form factor all-in-one does them all and does it well. From earlier years with Brother printers, I have always found them undesirable. However, with all the reviews from many other sources, I had to pick this up based on the features I wanted. I was not disappointed and will buy Brother again. If there was any downside, I would say nontechnical users may have trouble setting some of the advanced features, but if you have tried to use the same type of features on more expensive models, they require equal or more skill level. I did not test the faxing I have no use for this feature. Keep in mind, that if you have Windows 7 64bit, then the software won't show up on the Brother site for the Email to Server feature. No worries, just go back and select Windows 7 and the software to update the printer will work just fine it is just using Java. I would recommend this to a friend Helpful 57 Unhelpful 2 Report Comment salsa34 salsa34 Verified Purchase Rated 5 out of 5 stars Best printer ever. But, with them all they had problems right from the start. Now we had this printer for a month and now we can print like crazy. Kodak it was the ink always running out, HP was just problems after problems like the fax jamming up, ink issues, or not printing clear another, Canon was noise for a condo, software issues and other things like that. AlanMN1 Haven't used it a whole lot so far, but the quality of printing and scanning has been great so far. I need to reduce the resolution for scanning so the resulting files aren't so large, but it's not hard to do. It's so nice to not have to move and connect directly to the printer for printing or scanning. Additionally, the ability to print and scan larger documents duplexed saves paper and reduces what I have to carry around. Highly recommended as long as you don't need color.

I would recommend this to a friend Helpful 5 Unhelpful 0 Report Comment Frequent Frequent Rated 4 out of 5 stars Excellent. Solid. Nice options. Posted 8 years ago. Frequent I decided to buy this because of the reviews and went to my local Best Buy who did not have it in stock, so I did buy it elsewhere, FYI. The set up for fax was simple as someone else here said, and my Mac found the proper print driver on the download site section in seconds, since the CD was not up to date. I was disappointed the CD did not have an updated version of the scanning software apparently I'll have to buy it. But I can still do simple FAST doc scans from the Printer window, and impressively

faster than my former HP Injet AllinOne scanners speed. I should have bought it a long time ago. Benw425 I replaced a workhorse laser printeran HP 4L, which went forever and a day, but was very slow. The Brother printer has so many functions fax, scan, double sided printing, etc., does them all so well, and is FAST as well. Print quality is excellent. Faxing is reliable on my internet phone line. Scans in color despite being a black and white printer. The interface to my PC is intuitive and multifeatured. Would buy again in a heartbeat. BrotherSister Very happy with this economical multifunction center. No complaints so far. Easy to set up and use. Color document scanning is super easy with the document feeder and automatic creation of PDFs. I love the automatic duplex printing feature it is easy to activate when starting a print job. Easy to use as a fax machine too.I could not have made a better choice. This do it all machine is great. I have to had that The Brother Group does a great job when you heed their help. They take the time and always make sure that you have solved your problem. That is very important for me when I buy a product.Great wireless printing and with the brother printing app I can print from android phone and tablet can scan wirelessly straight to my laptop.

Jazzbeaux This printer does an excellent job. It is very fast and the documents come out very crisp. Scanning works great. I have not needed to use the fax function. The toner replacement price is reasonable unlike the HP laser printer that I replaced. I have had one paper jam when I was printing a large volume of pages, but it was easy to clear and the printer remembered what didn't get printed and then spit those papers out when the jam was cleared. But based on the excellent reviews online, we decided to go ahead and try it out. It has proven a very good decision so far. It was easy to set it up as a wireless printer though the initial set up did require the USB cable. It prints fast, print quality is very good. Scanner and Copier functions are great addons, not to mention fax haven't tried the fax yet. Automatic Document Feeder is very handy when you have to scan or copy multiple pages as you can avoid having to load pages one by one saves a lot of time and effort. Not much to complain about except that it is slightly high on price so you do have to get it on sale if you can. Would definitely recommend it. Marla I always buy laser printers and when my other one broke I found this one. It was a great price with a lot of features. Control center software works well and it's pretty easy to learn. Since you are sending data through your wireless connection, the print time varies. A picture I sent from across the house took forever but a website article was pretty quick. Only negative, other than not working with Air Print, is that it's slightly larger than the Brother printer I already had so it won't fit in the same spot on my desk. JoeMei This is our second Brother printer, and we have really liked both. This one in particular is nice for us because since I am in grad school, I have to print a lot of papers throughout the semester. The printer handles the volume very well and is comparable to what they have in the computer labs on campus.

HKTL if you need a printer to print black and white word documents, this is your printer. Fast, efficient, and easy to use. But if you're looking for a printer to scan pictures then this printer is not for you. Scanned pictures are not very good in quality, and if you scan multiple photos at the same time the scanner does not recognize that there are multiple photos. I would recommend this to a friend Helpful 2 Unhelpful 0 Report Comment mcsar1 mcsar1 Rated 5 out of 5 stars great allinone Posted 8 years ago. Although it took a few days to receive the printer since it isn't stocked in the store, the wait was worth it. I can't say that I had any setup problems and the wireless functions perform perfectly every time I use it. The printer is quiet, fast and has great print quality. If you're looking for a great reasonably priced mono laser printer, then I highly recommend the Brother MFC7880DW. I probably purchased too much but the price was reasonable and I wanted laser cuz inkjet plugs unless one uses the printer regularly. This printer fits the bill perfectly. I would recommend this to a friend Helpful 3 Unhelpful 0 Report Comment hardiness hardiness Rated 5 out of 5 stars Great product Posted 9 years ago. Used it for a few weeks and really like it. Using it with Nuance PaperPort which makes the scanning go smoothly. Have not used manual scanning feature. No problems detected. Good quality on scanning, copy, and printing. Can't verify fax yet. Set up went smoothly. Integrated nicely with network. Small compact unit. Expect cost to operate to be less than competitors. Speed is great except for highest quality of scanning.
