Page 8 What the Features Do Here are brief descriptions of the features which you can use with an ISDN 8510T voice terminal connected to a DEFINITY Communications System Generic 1 or Generic 3. The following descriptions include what each one does and how you might want to use it. The features in this section are divided into 3 main categories Fixed Button Features, Display and Softkey Features, and Switch Features. Only procedures for the last type, Switch Features, are provided in this book. Page 9 Message Retrieval Your Message light goes on to let you know that a caller has left a message. Follow your System's message retrieval procedures to get your message. Mute Turns off the microphone associated with the handset or the speakerphone, whichever is currently active. Use when you want to confer with someone in the room with you, but you do not want the other party on the call to hear your conversation. You are still able to hear the person on the call. Page 10 Lock Allows you to lock your Directory so that no one can make unauthorized changes in it; lock your Call Log so that no one else can view your Call Log entries; lock all of the softkeys so that no one can view or change any of the features accessed by the softkeys. Page 11 Switch Features Abbreviated Dialing Allows you to store selected telephone numbers for quick and easy dialing. Each number can be a complete or partial voice terminal number, an extension number, or a trunk or feature code. There are 4 possible types of lists— personal, group, system, and enhanced—and you can have a total of 3 out of the 4 possible lists see your System Manager for details. You can also order this user's manual from the Customer Information Center CIC in Indianapolis, IN. The address and telephone number of CIC appear in the front of this user's guide. This manual is shipped in the box with the voice terminal.<http://aucoindeshalles.com/menu/emission-estimation-technique-manual-for-mining.xml>

Gigaset AL140/AL145

Safety precautions

- Read this user guide and the safety precautions carefully before use. Explain their contents and the potential hazards associated with using the telephone to your children.
- Only use the mains unit supplied.
 - Only use the approved, rechargeable battery pack, never a conventional (non-rechargeable) battery pack, as this could result in significant health risks and personal injury. Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, which you can find out about by contacting your local authority or the dealer you purchased the product from.
 - The operation of medical appliances may be affected. Be aware of the technical conditions in your particular environment, e.g. doctor's surgery.
 - Do not hold the rear of the handset to your ear when it is ringing. Otherwise you risk serious and permanent damage to your hearing. The handset may cause an unpleasant humming noise in hearing aids.
 - Do not install the phone in a bathroom or shower room. The handset and base station are not splashproof.
 - Do not use your phone in environments with a potential explosion hazard, e.g. paint shops.

Page 14 Switch Features Since your 8510T voice terminal is connected to a DEFINITY Communications System Generic 1 or Generic 3, you may be able to use some of the following features. Check with your System Manager to see which of these features have been assigned to your voice terminal. Special Instructions Before you use these procedures for the first time, read the general directions below for using the many features of DEFINITY Generic 1 and Generic 3. Your System Manager can supply the information required. For a list of tones and their meanings, see the section titled Tones and Their Meanings. Quick Reference Lists At the end of this booklet is a set of quick reference lists. Page 17 To place a call using a personal, group, system, or enhanced list 1 Dial appropriate Abbreviated Dialing List code. Green light goes on steadily until callback is completed or canceled. Message light goes on at called voice terminal Note If reorder tone is heard, message is not stored; try again. Page 23 Tones and Their Meanings Ringing tones are produced by an incoming call. Handset tones are those which you hear through the handset receiver or speakerphone. Ringing Tones 1 ring —A call from another extension. 2 rings —A call from outside or from the attendant. 3 rings —A priority call from another extension, or from an Automatic Callback call you placed. Page 24 Key Words to Know activate To begin or turn on the operation of a feature. AUDIX Audio Information Exchange, an optional voice mail and message service that provides coverage for calls to you by recording callers' messages and reporting Leave Word Calling messages. Page 25 group list One of the 4 types of Abbreviated Dialing lists; programmable only by the System Manager. Contains telephone numbers useful to members of a specific group, and stores each of those numbers as a 2digit list item. Also known as the receiver.

Page 26 System Manager The person responsible for specifying and managing the operation of features for all the voice and data equipment in your network. Trunks of the same kind connecting to the same end points are assigned to the same trunk group. However, if you do not want to take up too much of your disk space, you can always download it in the future from ManualsBase. The option to print the manual has also been provided, and you can use it by clicking the link above Print the manual. If you want to quickly view the content of pages found on the following pages of the manual, you can use them. To help you do this, Figures 1 and 2 show you the top and bottom views of the

the user manual you need for your phone and more at ManualsOnline. Sales contract form for house, Foundation form work, A guide to recognizing your saints antonio, Sample letter recommendations for teaching, Humanitarian cross cultural experience statement. Reload to refresh your session. Reload to refresh your session. Drop button For disconnecting from a call or dropping the last party added to a conference call. Hold button A red button for putting a call on hold. Message light A red light which goes on steadily when a message has been left for you.

<http://acropolissa.com/images/canon-ir3025-user-manual-download.pdf>

Mute button For turning on or off the microphone of the handset or the speakerphone so the other person on the call cannot hear you. Transfer button For transferring a call to another voice terminal. 1 4 Volume control button When on a call, used to increase or decrease the receive volume of the handset or the Speakerphone or listen only Speaker feature. When you are not on a call, the Volume control button is used to increase or decrease the ringer volume or tones. Answering and Placing a Call To answer a call 1 Lift the handset. The green light below the red light goes on steadily at the selected call appearance button. NOTE If you are not connected immediately, press the call appearance button next to the flashing green light. To place a call 1 Lift the handset. The green light below the red light goes on steadily at the selected call appearance button. 2 Listen for the dial tone and dial the number you want to call. How to Use the Softkeys The softkeys on the 8510T voice terminal are the buttons labeled with arrows, located below the display. The Features Accessed with the Display and Softkeys In order to access the features or names on the second line of the display screen, you must press the softkey below the appropriate feature or persons name. Call Log initially set to list the 10 most recent incoming unanswered calls only. An option is provided so you may also choose to access the 10 most recent answered calls, the 10 most recent calls placed from your voice terminal, or choose not to log any calls. Options use to access such features as setting the clock and speakerphone, locking the Directory, Call Log, and all softkeys, selecting the display contrast, personalized ringing pattern, and the rate at which display messages are shown, and turning on or off confirmation and error tones. Dir Enter your Directory in order to quickly place a call.

location.

<http://www.musicmaestrodiscos.co.uk/wp-content/plugins/formcraft/file-upload/server/content/files/1627eb5594f9f9---brother-p-touch-xl-user-manual.pdf>

Set XIDN, MIM SupportN, Data Module Y insert Data Extension on last page or change it to your needs. And be sure that your wiring is right done. For each port of TN556 you should use 2 pair of wires. The 12 ports on the board are going on terminal without blanks. First pair of TN556 must be connected to central pair of wall jack whiteblue of 8510 set, second pair of TN556 must be connected to whitegreen pair of wall jack it will be first port. For the second port take pair 3 and pair 4 of TN556 and connect it to whiteblue and whitegreen pairs of other 8510 wall jack and so on. Have you more questions Audible Message Waiting. Init ID NCA TSC 1 PROGRESS n n 0 2 PROGRESS n n 0 3 PROGRESS n n 0 4 PROGRESS n n 0 5 PROGRESS n n 0 6 PROGRESS n n 0 7 PROGRESS n n 0 8 PROGRESS n n 0 9 PROGRESS n n 0 10 PROGRESS n n 0 11 PROGRESS n n 0 12 PROGRESS n n 0 If you want to use 8510 on this board you have to remove all trunk ports from this board. Interactions The add britrunk board PPCSS command is rejected if PPCSS identifies a TN556B circuit pack, and a port on that circuit pack has already been assigned to a station or datamodule. Thanks, Zulma TEST RESULTS Port Maintenance Name Alt. Name Test No. Result Error Code 01B1801 BRISET 1888 626 FAIL 1113 01B1801 BRISET 1888 628 ABORT 1005 01B1801 BRISET 1888 629 ABORT 1113 01B1801 BRISET 1888 630 ABORT 1113 ALARM REPORT Port Maintenance On Alt Alarm Svc Ack. Maybe it will sound like not intelligent. but I remember that sometimes a pairs polarity does matter. First try to swap positions of blue and whiteblue wires. Then maybe try swap green and whitegreen. For BRI endpoints supporting MIM initialization, this error indicates that the endpoint has not been bound to a signaling link that is, SPID initialization has not been completed.

Since the signaling link associated with the endpoint is not identified until SPID initialization completes, this error does not imply that the signaling link is connected or disconnected at Layer 2 nor does it provide the status of TEI assignment for the endpoint. So try status briport 01b1801 and will see. Here is Installation docs The 8510T can receive power from the switch or from an auxiliary power supply. The installer can select the type of power used by placing the two power jumpers over the correct set of pins. The power option jumpers are located at the bottom center of the terminal. On the right side of the pins, on the plastic housing, you will see the label POWER and a diagram of the correct settings. The jumpers are labeled PHAN phantom power and AUX auxiliary power. The terminal is shipped in the AUX position. You must verify that the jumper settings are set correctly for your configuration. 3. Looks like We should use SPID in station config in that case you have to set MIMy and set SPID to some value for example extension number. Then we see into the installation manual procedure The Service Profiler ID SPID When ISDN terminals are initially installed, a unique SPID number must be entered into the terminal. This number identifies the terminal to the network. Usually, the system manager provides the SPID for each terminal in the system. Use the following procedure for entering the SPID in an ISDN 8510T terminal. 1. Press and then press. 2. Dial the numbers, "43" ID. 3. Press on the dial pad. 4. Enter digits from the dial pad for a new SPID number. If, at any point, you make a mistake, press to erase the number and reenter the SPID. 5. When the SPID number is correct, press on the dial pad to save the new SPID in the terminal. Thanks for helping me. Here are the results of status bri and stat sta. Thanks again Dimas! What do you think I should do next.

STATUS BRIPORT Port 01B1801 Version Service State inservice Active NCATSC Count Maintenance Busy no Layer 1 State pendingactivation TEI Value Layer2 State Endpt Extension Endpt SPID Service SPID. I will go and check about the AUX and PHAN and so on. You don't have to be sorry for anything. thank you! for taking the time to help me Zulma Sorry again. The phone is turn on. There is an issue that I have to run wires from our server room to my desk. But that's no problem. I can do it! Anyway, we did it Dimas. Thanks for your help and for being patient with me, Zulma Reasons
