# 99 honda accord manual transmission for sale

So I drove more than an hour to look at the truck and found that some the photos on Car Gurus were photoshopped to conceal running board damage, paint fading on the front bumper, and at least 1 burn hole in the back seat. I called to discuss the price and the salesman seemed annoyed that I asked to negotiate. I wouldn't trust anything they say or represent. Rose is awesome. Very courteous salesperson No problem with dealership just not the right car for needs. Being several hours away, he was willing to send a short video of some specifics. He stayed in touch and had the vehicle ready for me to drive when I arrived. Although I ended up taking a pass on the particular vehicle I was interested in, I would certainly consider another trip there for the right vehicle. Amazingly they had a list of cars for reasonable prices that met my ever need. If you're looking for honesty and professionalism look no more because this small dealer provides it all. Definitely check out their inventory and I promise you'll leave a happy camper. Elliot had everything I wanted in a car and even worked on the price. Very happy customer. Honest and straight forward. Vehicles priced fairly. In hindsight should have purchased vehicle I looked at. It sold. Will never buy a car from them. Vehicle already had a contract. Dealer assured me they would inform me when a similar vehicle was available. 2 thumbs up But we had other options to view as we didn't put a deposit on the explorer totally our fault. The staff was amazingly nice and professional. Konsatine was my salesman. He was great!! Didn't buy from them but did appreciate the texts and emails during decision making process. They have me a great deal The only responses I received were of promotional sales campaigns that they were running. I gave up and moved on to dealerships that were willing to actually respond to my questions. <http://sooam.com/files/fckeditor/13374502445f51934744663.xml>

After weeks of asking for the information, I asked if the vehicle was still available because I couldn't find it on CarGurus anymore. Was told it was still available, requested more information again, was told weeks later it wasn't actually available. Not helpful. Despite the car Juan is refusing to negotiate at all and still In 2000, it became the first massproduced Super Ultra Low Emissions Vehicle. And in 2005, it was among the first vehicles in its segment to offer sidecurtain airbags as standard equipment. No wonder the Accord has sold nearly 10 million units since its introduction in 1976 and remains one of the bestselling vehicles in the U.S. For 2011, the Accord comes in a number of variations, including sedan and coupe trims, as well as the new Accordbased Crosstour crossover utility vehicle, or CUV. The Crosstour comes equipped with a rear tailgate, providing access to its versatile cargo area. Sedan offerings include the LX, SE, and EX trim levels. Owners can add optional packages for the LX and EX, upgrading them to LXP and EXL, respectively, while the new SE is a standalone trim. Accord EX and EXL trims also come equipped with a fourcylinder engine, though it generates 190 hp. Reviewers like its wellrounded nature, and the Accord meets owners expectations in just about every category. It performs and handles well, looks contemporary and stylish, and offers a roomy, wellequipped, and wellthoughtout interior. In addition, the Accord consistently achieves high safety ratings and excels in reliability and affordability. But Honda continues to hold on to its reputation for quality when other automakers such as Toyota haven't fared so well. Competitive sedans built by Ford and Hyundai, to name just two automakers, will continue to put pressure on the Accord, but its longevity and wellregarded brand name will continue to make it a viable choice for prospective buyers seeking a practical, reliable, welldesigned daily commuter. <http://www.primabusiness.at/userfiles/canon-mx700-manual-online.xml>

However, some reviewers consider the Accord slightly dated, and Honda has responded by regularly updating the Accords interior and exterior. The automaker made minor updates to the interior in 2010, and for 2011 revised the Accords grille, front bumper, trunk, and wheels. More extensive revisions, however, will more than likely have to wait for a generation change around 2012 or 2013. Facing long lines at the pumps, many buyers were ready for more fuelefficient transportation that didnt compromise on performance, comfort, style, reliability, or practicality. The Accord fit the bill perfectly. An upscale Accord LX debuted in 1978, and a fourdoor sedan with a 72hp, 1.8liter engine hit the streets in 1979. In 1981, an SE Special Edition trim with leather upholstery, power windows, audio system with cassette player, and alloy wheels helped build the Accords reputation for quality and comfort. The firstgeneration Accord proved so popular that demand overshot supply, and dealer markups were not uncommon. Featuring sedans built in the U.S. at a plant in Marysville, Ohio, the secondgeneration Accord was longer than its predecessor. Honda stretched the wheelbase by about 3 inches and overall length by a little less than 2 inches. The automaker also restyled the Accords body to give it a more upscale look. Trims included the base twodoor hatchback, the LX twodoor hatchback, and a fourdoor sedan. In 1984, Honda introduced an optional fourspeed automatic transmission, replacing the previous threespeed, and in 1985 the automaker introduced a new trim, the SEi, powered by a fuelinjected 1.8liter engine, which added 24 hp. The wheelbase grew again, by 5.9 inches to 102.4 inches, and the Accord rode on a redesigned suspension with double wishbones at all four corners. Again, Honda stretched the wheelbase, to 107.1 inches, which moved the Accord from the compact to the midsize automotive segment.

Perhaps as a result of the Accords lengthening wheelbase, the hatchback disappeared from the lineup, which now included sedans and coupes at DX and LX trim levels, as well as at a new highend EX level. In addition, in 1991, Honda introduced a new Accord wagon trim, available at the LX and EX trim levels. A new 2.2liter, 130hp fourcylinder engine powered the fourthgeneration Accord. It produced 125 hp for DX and LX trims, and 130 hp for the topoftheline EX trims. In 1992, all Accords received a driversside airbag as standard equipment. Some reviewers considered the exterior design of the fifthgeneration Accord somewhat clunky, especially when compared to the more refined design of the previous generation. Once again, the Accords wheelbase grew in length, to 106.9 inches, which resulted in more interior space. In addition, the coupe rode on a slightly shorter 105.1 wheelbase, while the sedan retained the previous generations 106.9inch wheelbase. For the sixth generation, Honda dropped the wagon from the lineup. Dual front airbags became standard, while side airbags were standard in EX trims and available for the DX and LX trim levels. In 2000, the Accord became the first internal combustion, gaspowered vehicle to achieve Super Ultra Low Emissions Vehicle SULEV standard. SULEV Accord EX sedans were offered in California to comply with that states stringent emissions standards. Once again, Honda abandoned the Accords sleek exterior lines in favor of a solid yet less fluid look. The Accord rode on a more tightly tuned doublewishbone suspension, which provided more precise handling, while the interior excelled in form and function. Still frontwheel driven, the Accord offered a choice of a 160hp fourcylinder or a 240hp V6 engine and three transmissions, including a new fivespeed automatic, which came standard in V6 trims, and a new sixspeed manual, which was available only in the V6 coupe.

With the seventh generation, Honda introduced an optional navigation system for the Accord and made dual front and sidecurtain airbags standard on every Accord trim in 2005. In addition, the Accord Hybrid, with a unique powerplant generating 253 hp, debuted in 2005. Accord highlights for the eighth generation include the incorporation of Hondas Advanced Compatibility Engineering body structure, which further improves ride and handling, and the inclusion of the automakers Vehicle Stability Assist as standard equipment in every trim. It also was a finalist for Motor Trends Car of the Year. However, some feel the Hybrids slightly better fuel economy numbers when compared to a

fourcylinderpowered Accord do not justify its higher price tag. A year later, Honda offered optional stability control, so buyers should keep an eye out for Accord trims equipped with that system. The tightly tuned suspension of the seventhgeneration Accord 20032007 provided a comfortable ride, but some reviewers report lessthanstellar brakes and handling for cars manufactured during this period. However, in headtohead driving comparisons with competitive vehicles, the Accord performed very well and remains a good usedcar option. Again, buyers may want to keep an eye out for V6powered trims, and even the topoftheline EX trims from this generation will be affordable to budgetminded buyers. It's reliable, roomy, efficient, and unpretentious. Yet unlike most faUnfortunately, numerous flaws remain, small oversights that, collectively, produce There's good reason for this, as the Accord excels at everything it is asked to do. And tells me the car was sold an hour before Follow up from them was a different person, only by text. Unfortunately, the car wasnt for me. Chris and staff were and are fantastic. !! This seems to preclude having my mechanic, 20miles away, from checking out the car. This is unacceptable. I wanted to see if it Will not shop here ever. No one called back to inform that the vehicle was sold. Good thing I called before leaving. My drive would've been a waste of time, 1 2 hours away. Highly recommended. My last email to them they never answered. And many were sent! These people are so amazing. Its not a fancy set of wheels, and not your style if you dream of sports cars. It is however comfortable, dependable, and a great vehicle for every day—and the brakes work when you need them. The size class for trucks is defined by the gross vehicle weight rating GVWR, which is the weight of the vehicle and its carrying capacity. EPA retests about 10% of vehicle models to confirm manufacturers' results. This is typically measured in liters 3.2L, for example, though sometimes it is expressed in cubic inches. I4 and V6 refer to the configuration and number of cylinders. Transmissions must either be controlled manually by the driver "Manual Transmission" or automatically by the vehicle "Automatic Transmission". One type of Automatic Transmission is the Continuously Variable Transmissions CVT which doesn't have a fixed number of gears. Common configurations include frontwheel drive, rearwheel drive, fourwheel drive and allwheel drive. Select Ram in the Make menu. Please try again later. The Inspector 069 5.0 out of 5 stars I am the original owner. When I picked up the car from the dealership, it had only 35 miles on it. Upon ownership, I primarily used the vehicle for highway driving. Which they claim, is better than city driving. Other than the typical oil change, I never had any mechanical issues before 125K. I have always followed the maintenance schedule. This also includes having the timing belt replaced at 100K miles. Seven year ago, my alternator finally gave way. Honda performed the replacement. Five years ago, my main oil seal went bad. I had Honda replace it. Then, a year after that, my water pump seal needed replacement. But you know what A car having over 125K, some seals are bound to dry up and become brittle. Just recently, one of my brake lines corroded. It retailed for 575.00 at my local Honda dealer.

I have learned over the years, that if you were to purchase from a dealer that has an online store, I found the prices to be twenty to thirty percent less than the local dealer. I only put OEM parts in my car. Oh, and of course, the speakers. Taking into account the age of the car, I decided to purchase a few OEM parts before they become discontinued. For example, an OEM compressor, dryer, and suction hose. The bearings in my compressor, after twenty years, are finally beginning to rattle. It gets very hot in my state, so I like to be prepared. In closing, I feel that if you are good to your car, your car will be good to you. I have never had a flat, or been strained on the side of the road. If a part starts to wear out, my car will let me know. Sounds crazy huh For example, when my alternator began to malfunction, it made a winding sound when accelerating. First clue, alternator issue. When the seals began to leak, indicators would light up. When the brake lines began to degrade, I realized that when starting the car, the ABS light would illuminate longer than usual. Cars will give you a sign of their issues, you just have to learn not to ignore them. I thought about purchasing a new Honda Accord. But, I was disappointed to learn that Honda has eliminated the V6 from their choice of engines. The carpet pile is shorter, giving it a feel of outdoor carpeting. The radio. and GPS housed into a display that looks out of place, and constructed out of cheap plastic. No, I will keep my 99 Accord on the road for a few more years. Has about 148k miles on it right now and still has the original transmission and engine. Only issues it has are a slow oil leak, and the sway bar link bolts loosen enough every few months to where theyll make noise. The original flamenco black pearl paint and clear coat is very damaged, so I liquid wrapped it in satin finish jet black Air Wrap. Everyone thinks it has brand new paint and it looks just as good as it runs.

Only aftermarket parts on it are a new Sony head unit, new speakers and a small trunk lid lip, as well as a dash cam. It is, by far, my favorite and most reliable car. Parts are cheap and easy to find, and the car is pretty easy to work on. Don't touch nothing Had alittle money so thought maybe I need

to do it, they broke 3 motor mounts after checking transmission fix that then left the transmission was shifting wrong going home so brought right back it went out they said. Now wasn't doing nothing sounded like a brand new car till he got a hold of it 21 hundred took me 13 months to get that much to fix the transmission messed up my electrical putting in a great new stereo messed it up because they don't know how to work on in America in small towns Honda Accord One thing I didn't like was a place told me to schedule transmission service just because of the year, that point own is 6 yrs old at the time. Please don't trust mechanics because they don't know nothing about nothing. If it's not broke don't touch it. Serious now I have a great running car but all the trouble because they said it needed a check up. They broke motor mount 3 and transmission went out 2 week after because it didn't need a check up. That was 21 hundred dollars. Second hand Next winded a good stereo the electrical wire hotness. Wasn't put in right and never been the same., and they cut the wrong wire and it started burning on price at a time that was 900. Over not needed because they didn't know how and that Honda never the same. If had not touched them 3 major things it would have 5 stars but truly should of but not 1 star because America mechanics don't know what there doing, and now my situation I can't get another Honda Accord even to replace what I had 145, thousand miles and I'm disable not enough money to even by another 99 Honda Accord. This is how good these care are when you drive it lignment as never been touched take your hands off and straight ahead 3 people I know have said this.

All 3 never touched there Honda's accords and not one think broke run like a champ. I'd give anything what I know now I would have a perfect Honda. the alternator went out change and 2 battery's changed bought it 5 yrs old and paid 6,000 and now I got a car I can't take my worries off because people that or certified to be Accord Accord mechanics and don't know one thing 3 different mechanics and 3 major mistakes and left worrying if I'll make it home I haven't the money to by another's but if I would I d buy another but disable don't have money to do this. Want to help someone not to do what I did is why I'm putting this out The only major problem it had was that the transmission was recalled and replaced with no problem. I have been to 37 states with it. It still rides comfortably. My goal was to drive it to 200,000 miles. 200,000 became 250,000. Now I think Ill just continue to drive it. I did maintain it very well oil changes every 4000 miles or so and I think thats the key. The engine rings are leaking a bit but hey, the car still runs very well and a quart of Rislone every few thousand miles helps it along. I will probably be buried in it. However, the wagon was discontinued in North America while the coupe was discontinued in Japan. This generation also spawned two distinctively branded performance versions for European and Japanese domestic markets, dubbed Type R and Euro R, respectively. A nearly identical sister car, the Honda Torneo, replaced the previous Honda Ascot and the Honda Rafaga in Japan, which was sold at both Honda Verno and Honda Primo Japanese dealerships, while the Accord remained at Honda Clio locations. This was the last generation that was badge engineered as the Isuzu Aska.

This effort reflected Hondas positioning of Honda Clio as a luxury car dealership that sold the luxury sedans Honda Legend and Honda Inspire, similar to their efforts in North America with the Acura brand. Honda continued to offer the Accord station wagon in Japan. All trim levels sold in Japan were available with Hondas newly created, internetbased telematics service called Internavi. It was also fitted with a unique factory body kit that included flares and was available in some colors not available to other Accords such as Milano Red. The Accord sold at Honda Clio locations and the Torneo sold at Honda Verno and Primo locations are the same car, aside from minor cosmetic differences in the exterior, most notably front of the car. These included factory rear privacy glass, a titanium gear knob, optional Redchecker interior original goldchecker and bronze coloured alloy wheels. The Hseries DOHC VTEC engines were limited to 7800 rpms. The F20B had a unique blue valve cover and like all the larger displacement Honda engines, the F20B was mounted with a tilt towards the driver. F20B engines could rev at higher rpms than H22As because it had a shorter

stroke. The engine was rated at 180 PS 132 kW; 178 hp but with better midrange characteristics. Moving the gearstick over to the right allowed manual selection of 1st, 2nd, 3rd or 4th gear using up and down shift actions just like the sequential gearboxes used on the JGTC NSX. When a particular gear is selected, the gear stays in position at all rpm. When pushed against the rev limiter, the engine would bounce against it just like a manual. However, the gear ratios for each gear were the same as the normal mode. The transmission still worked like a normal automatic transmission in all other operating modes. The H23A also came with a blue valve cover and was the largest displacement of the Hseries Honda engines. The H23A was mounted with a tilt towards the driver. The H23A had a longer stroke than the H22A.

Specifications for the H23A were; 87 mm 3.4 in X 95 mm 3.7 in bore and stroke and H22A has 87 mm 3.4 in X 90.7 mm 3.6 in bore and stroke. The H23A had better acceleration because the peak torque occurred sooner at lower rpm when compared to the H22A. A design for the sedan by Shinji Takashima and Toshihiko Shimizu was chosen in January 1995 and later frozen for production by the middle of 1995. Prototype test mules were tested from mid 1995 in CD Accord body panels, with full body prototypes being used from 1996. Design patents were filed on 8 March 1996, with development ending in March 1997. Sedan mass production began in August 1997, with customers deliveries starting on September 23, 1997. The SE was only available with the automatic transmission. The DX remained the value oriented trim with no audio system, manual windows, manual locks, no cruise control, rear drum brakes, and 14 inch steel wheels. The DX Value Package added a radio cassette player, air conditioning, and cruise control; this was known as the Accord DX in Canada where it was the base model of the lineup. The LX trim added power windows, power locks, door courtesy lights and 15 inch steel wheels; the SE special edition package available since 1999 added 15 inch alloy wheels, and optional leather trim, but was only available with the 4 speed automatic. The EX trim added ABS, alloy wheels, keyless entry, rear disc brakes, and upgraded cloth. Leather seating, CD player, and power sunroof were factory installed options for the EX. All V6 sedan and coupe models received the 3.0L V6 SOHC VTEC engine rated at 200 bhp 150 kW and 195 lbft 264 Nm derived straight from the Acura 3.0 CL, ABS and automatic transmission. Some dealer installed options included gold finish kit, gold finish exhaust tips, gold finish wheel center caps, 6 disc in dash CD changer, tape deck, fog lights, wing spoiler, alarm system, sunroof visor, car cover and accessory chrome wheels.

However, in 1999, the Accord became the first Honda in Australia to be imported from Thailand. In March 2001, the Accord received a facelift, while at the same time, the option of a manual transmission was dropped. New colour choices with the facelift included Naples Gold, Signet Silver, and Nighthawk Black, the first time that black was offered in an Australian market Accord. A new front fascia, rear bumper, side skirt alteration, new taillights and wheel designs freshened the Accords look. The interior saw few changes with the exception of some fabric and audio configuration changes. The LX and LXV6 now included a standard CD player, and the EX 4 cylinder now included a 6 disc in dash CD changer with cassette player while the EXV6 offered that stereo plus automatic climate control. In the Philippines, only the sedan was available and offered in VTi and VTiL trims. The VTi model was fitted with a 2.0L I4 VTEC engine rated at 152 bhp 113 kW while the top VTiL trim was fitted with a 2.3L I4 VTEC engine rated at 157 bhp 117 kW. Both models are available with either a 5 speed manual transmission or a 4 speed automatic transmission. Previously, the Accord ran four years on a single bodystyle and facelift before being redesigned. The typical Accord generation cycle was a 24 trend, with a newly released model running for years 1 and 2 unaltered, then getting a facelift for years 3 and 4 before a major redesign. This generation would run a total of 5 years in a 35 trend, with the facelift occurring in year four. Accord sales remained steady despite the additional year. This caused Honda to extend the warranties for the 2000 through 2001 models to seven years or 109,000 miles 175,000 km. 1998, 1999 and 2002 cars were considered for extended coverage on a case by case basis. No formal recall occurred. In Canada,

recall letters were sent out to owners who fell within a certain VIN range; this warranty was later reextended for some owners to seven years in length.

In late 1998, the Accord was equipped with foldable mirrors. In 2001, the Special Edition was added and the DX ValuePackage was reintroduced for 2002 models. Small numbers of Accords were imported right hand drive from the U.S. before sourcing switched to Thailand once Accord assembly began there. The Thai factory continues to supply New Zealand with the latest generation Accord and now also ships that line and other Honda models to Australia and elsewhere in South East Asia. The company announced it was recalling vehicles citing drivers airbags that deploy with too much force during collisions. Honda says 2,430 faulty airbags were installed as repairs to customer vehicles after a collision. Since November 2008, Honda has recalled some 1.7 million of its cars for airbag concerns. It was available as a sedan and a 5door hatchback liftback , with the U.S. imported coupe completing the range. This model was renamed as the SE Executive in late 1999. In 2001, the trim range was expanded with a Type V; with leather trim as standard equipment, satellite navigation and a tiptronic automatic transmission as optional. The Sport model, which was as the SE, came with modified styling, spoiler, and a colorcoded side skirt as opposed to black plastic. The top of the range SE Executive only became identified as such in 2000 with a badge SE EXECUTIVE on the hood lid. Walnut trim interior was also dropped for the SE Executive during the facelift, while a new climate control system was added. The engine was mated to U2Q7 5speed manual transmission with helical Torsen LSD. Like the Euro R, the Type R was fitted with a factory body kit. Other differences from the standard model include hydraulic power steering on the Type R. The 5 speed gearbox was revised with stronger synchros in response to a number of failures on the earlier cars, and the exhaust was fitted with more subtle tips, angled downwards and unpolished in comparison to the prefacelifts straight chrome tips.
