Canon reserves the right to change the specifications of the hardware and software described herein at any time without prior notice. Contact your Canon Please refer to the If you leave the This may cause If any other Remove the camera from If you use the camera in this state, this may cause a fire or electric shocks. Never use it in this state. Thoroughly wipe the Waterproof Case interior and the camera dry. Please contact your Canon Customer Support Help Desk. Catching a single strand of hair or a tiny grain of sand in the seal can cause leaks. Pulling the seal may overstretch it, which may cause the case to not close properly and cause leaks. Extreme care should be taken to ensure the waterproof seal is level around the mounting groove. Please check to ensure that the waterproof seal is working. Please check Please contact your Canon Customer Support Help Desk. Remove the neck strap and attach the wrist strap before use underwater. There is danger that the neck strap will become entangled and cause strangulation or another mishap. If anticondensation Catching a single strand of hair or a tiny grain of sand in the seal can cause leaks. If you leave the Waterproof Case containing the camera in direct sunlight or in a hightemperature place, this may cause a fire or the case to burst.<http://charletdesign.com/uploads/dwl-2100ap-wireless-access-point-manual.xml>

Register a free business account Full content visible, double tap to read brief content. Please try your search again later.Of course its also ideal for taking worryfree pictures in the pouring rain, at the beach, or on the ski slopes. You can use your cameras internal flash for lighting purposes. Or, use the internal flash to trigger a slaved external strobe. This camera case is compatible with Canon's PowerShot G11 and PowerShot G12 cameras.To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. qozzy 5.0 out of 5 stars That was pretty awesome. I did have some trouble opening if after a 2 day dive, but that probably shows how well they shut. Lets just hope it continues to work the way it does. Update It has been 3 years and the housing is still going strong.<http://esistore.com/userfiles/dwl-2700ap-manual-pdf.xml>

I did have a mini panic attack when there were some droplets on the inside of my case after a dive, but I think that was mainly because I was using it to position myself for the shot and bumped it a few times. Cleaned it up, brought it in for another dive, and it worked fine. You do have to take very good care of it. On some days when I get lazy and do not rinse it out as well which includes depressing all the buttons in warm, fresh water numerous times, they do get a bit stuck after that. Im guessing that given enough of that, the orings will one day give way, so be sure to rinse it thoroughly. I also oil the yellow oring with the silicon gel it came with every couple of months when not in use, and bought some small packets of silicon gel to absorb condensation or minor leaks. The front finger wheel on the G12 is not accessible with this case, but Ive learned that theres a shortcut button to get around this, so no issue there. Everything else works as it should. This camera is slightly buoyant, so I bought the WWDC1 set of weights here It screws to the bottom where the tripod attachment is, and I find that 3 plates make it sufficiently neutral buoyant such that it does not shoot up or sink when I let go of it. Enter this waterwater housing for my Canon G11. I figured that if it ruined my camera, it wasnt my expensive ones and this would get me a better quality of images than a film disposable. Im SO glad I went with this sucker. It performed beautifully without a leak. I followed the instructions and always put my camera in this case before heading off to the beach so I do recommend that. I also put the silicone on before each use, Im not sure if thats necessary or not but I didnt want to chance it. I had dozens of people ask me what the heck this was but they were pretty impressed when they saw the pictures.

Now the only downfall is that the screen is hard to see when using this underwater and often you wont know without looking at the lens if the camera is on or not. It also is pretty big. I didnt use the flash diffuser either. Overall this is well worth the money, especially if you would be spending this amount for an underwater digital camera. However, after getting a good deal on a Canon G12, I decided to see what I could do with the underwater housing. A major upgrade. Of course, its bigger than the TS3, but its more durable, goes deeper, and takes amazing pictures and video. Especially The buttons and knobs are oversized so I can easily operate all camera functions while wearing dive gloves. In comparison, the controls on the TS3 are so small that I had to remove my gloves to operate the camera. The most important measurement is the quality of the photos. The TS3 is a pointandshoot that takes adequate pictures about 30 feet deep. As I work deeper on free dives I risk ruining the camera. The underwater housing allows me to take the G12 prosumergrade capabilities much deeper without fear of ruining the camera. The trade off is size. The TS3 fits in my sleeve while the G12 with underwater housing is always dangling from my wrist or in my hand. Of course, the decision is ultimately up to the needs of the user. A pointandshoot like the TS3 is fine for snorkelers; if you want to carry your prosumer features longer and deeper, use the G12 with

underwater housing. This page requires Javascript. Modify your browsers settings to allow Javascript to execute. See your browsers documentation for specific instructions. The Product purchased with this limited warranty is the only PowerShot Digital Camera to which this limited warranty applies. Warranty exchange or replacement does not extend the original warranty period of the Product. The sole warranty, if any, with the respect to such nonCanon brand items is given by the manufacturer or producer thereof. This limited warranty covers all defects encountered in normal use of the Products, and does not apply in the following cases A Canon Customer Care representative will attempt to diagnose the nature of the problem and correct it over the telephone. If the problem cannot be corrected over the telephone, you will be asked to follow the applicable procedures for MAILIN SERVICE. Note that a dated proof of purchase is required at the time of service. MAILIN SERVICE is a program under which your Product is repaired by a Canon U.S.A. or a Canon Canada authorized service center for the Product. You will be given the name, address and phone number of an authorized service center. It is your responsibility to properly package and send the defective Product, together with a copy of your dated proof of purchase, a complete explanation of the problem and a return address to the authorized service center at your expense. Do not include any other items with the defective Product. The Product covered by this limited warranty and proven to be defective upon inspection will be repaired and returned to you without charge by the authorized service center. Any Product received by the authorized service center that is not covered by the limited warranty will be returned unrepaired, or at the discretion of the authorized service center, you may receive a written estimate of repair at such cost as the service center may establish from time to time.

Take great underwater shots and be worryfree during inclement weather with the WPDC34. Waterproof to 130ft. Neck strap, wrist strap and silicone grease included. I had to power off between shots. It released itself at the safety stop and I noticed after the dive that there was a cut out in the clear plastic around the shutter button that I could have used to insert a pick and release it manually. But if I compare it to the WPDC12 housing for the PowerShot A570IS, then I have every reason to believe that this product will prove entirely satisfactory. The buttons are large enough for fingers covered by 7mm gloves, without accidentally pushing more than one button. I live on the Big Island where the reef is only a 15min drive, thus get to use my gear every few weeks.

I bought the G11 as an everyday carry camera and a dive camera. I live on the Big Island where the reef is only a 15min drive, thus get to use my gear every few weeks. I bought the G11 as an everyday carry camera and a dive camera. They're nice and big. On the G11 and maybe this is true on all cameras, the buttons for the "Scene" mode and for the "Video" mode are right next to each other. Some of the controls e.g. zoom are easier to use with the housing than without. The problem is that if used underwater, it should have weights attached to make it buoyancy neutral. After receiving the housing, I had to order the weights. The unit worked very well. Two comments when you turn the dials on top, the camera dial rotates in the opposite direction; pushing the button half way to clear a pic that's on hold is problematic easily solved by having the pic hold for 2 seconds. I am very satisfied with the casing and the ease with which to use my camera once it's inside the casing. My pictures were outstanding and it was so exciting to be able to use my very expensive camera under water. The camera has an underwater white balance setting for available light photography. This emulates the need to rotate the control dial. You can follow any responses to this entry through the RSS 2.0 feed. Pinging is currently not allowed.
