Important User Information Important User Information Safety instructions Save these instructions. 5 Read these safety instructions before use. Note When using your telephone or connected equipment, the following basic safety precautions should always be followed to reduce risk of fire, electrical shock and other personal injury. Follow instructions in the equipments user guide or other documentation. Always install equipment in a location and environment for which it is designed. For mains powered telephones Only operate with the mains power voltage indicated. If you are uncertain of the type of power supplied to the building, consult property management or your local power company. For mains powered telephones Avoid placing the telephones power cable where it can be exposed to mechanical pressure as this may damage the cable. If the power supply cord or plug is damaged, disconnect the product and contact qualified service personnel. Unauthorized changes or modifications could void the users authority to operate the equipment. Do not use the telephone to report a gas leak in the vicinity of the leak. Do not spill liquid of any kind on the product or use the equipment near water, for example, near a bathtub, washbowl, and kitchen sink, in a wet basement or near a swimming pool. Do not insert any object into equipment slots that is not part of the

product or auxiliary product. Do not disassemble the product. Contact a qualified service agency when service or repair work is required. Do not use a telephone other than cordless type during an electrical storm.http://www.FlashPointIP.com/fckupload/brobo-waldown-8sn-manual.xml

See section " Settings " on page 75. Can always be pressed instead of replacing the handset. See section " Settings " on page 75. See section " Log off " on page 25. Press the key to retrieve the message. See section " Access the Mailbox " on page 57. See section " Key panel " on page 91. Only the standard symbols are shown Volume, Loudspeaker and C. When an information ends with an exclamation mark !, this means that no further action is possible. When you are navigating through the menus, the selected menu is highlighted with a black frame. The special dial tone indicates an active diversion, an active absence information or waiting messages. After a power failure the phone will restart automatically. However, when a password is requested, you must log on before the phone can be used again. This procedure will also clear the Check the display on your phone and read the required sections in this chapter to continue with the start up procedure. After a power failure the Call List is cleared. In this case you must enter a valid user identity and password. The password is obtained from, and can only be changed by the system administrator. If no key is pressed during this time, "no change" is selected automatically. This mode is reserved for your system administrator. This takes about 1 minute. After a self test, the phone is ready for use or ready for log on. To log on, see section " Log on " on page 21 If no key is pressed during this time approximately. 60 seconds, "Yes" is selected automatically. You can speed up the procedure by pressing the Loudspeaker key. If a power failure occurs, the software must be downloaded again. This is the most common option. You cannot log on or off. This option can be used for phones in conference rooms, receptions etc. If the displayed number is your number The number for SOS calls might vary between countries. The request to enter a password can be changed, contact your system administrator.

You can log on with your own extension number and get your personal categories. To get the letter A press key 2 once, for B press key 2 twice, to get C press key 2 three times, and so on. Every new word starts with an upper case character that is after a space has been entered. However, you can force the phone to enter all characters as upper case only, or lower case only, see below. This is only valid for the characters AZ. If you for example press 9, the following character options are shown on the display The text Log off is displayed. Stored numbers can consist of a maximum of 32 digits. This can also be used if no external line is free You have to answer within eight seconds, otherwise the

Callback service is cancelled. When the called extension replaces the Frequently used external numbers are stored as Common Abbreviated Numbers in the exchange. Common Abbreviated Numbers can be dialled from every extension that has the authority to do so. Stored numbers can consist of a maximum of 24 digits. For programming them, see chapter " Programmable Keys " on See section " Web Server " on page 98. You can switch between handset and monitoring, mute the microphone, make an inquiry, transfer the call, establish a conference or put the call on hold to perform other tasks.
