Following these procedures will help ensure product reliability. Wherever possible, illustrations are provided which will assist technicians in identifying the special tools required and also showing such tools in use. Special tools may be obtained from the manufacturer, SPX Tools, the addresses of their branches will be found in the Special Tools Glossary contained within this Section. This manual cannot possibly anticipate all such variations and provide advice or cautions as to each. Any person who departs from the instructions provided in this manual must first establish that they compromise neither their personal safety nor the vehicle integrity by their choice of methods, tools or parts. Individuals who undertake their own repairs should have some skill or training and limit repairs to components which could not affect the safety of the vehicle or its passengers. Any repairs required to safety critical items such as steering, brakes, suspension or supplementary restraint system should be carried out by a Land Rover Dealer. Repairs to such items should NEVER be attempted by untrained individuals. A Warning, Caution or Note is placed at the beginning of a series of steps. If the warning, caution or note only applies to one step, it is placed at the beginning of the specific step after the step number. Warnings, Cautions and Notes have the following meanings Warning Procedures which must be followed to avoid the possibility of personal injury. Caution Calls attention to procedures which must be followed to avoid damage to components. Note Gives helpful information. The use of this equipment will assist with the fault diagnostic abilities of the Dealer workshop. In particular, the equipment can be used to interrogate the electronic systems for diagnosis of faults which may become evident during the life of the vehicle. My 2008 LR3 went to the dealer for maintenance and came out with this problem which I found out later.

<https://skazkina.com/ru/boss-dr-sample-sp-303-manual>

I do not know if it happened at the dealer or just when I try to open it at my house. What I could see is that everybody I talked to about it says the same thing. "It is a LR3 problem that LR hasn't addressed yet. Not only that to repair it you have to almost destroy the inside back trims and cover. Is there a recall on this issued. I found out this problem when the truck has about 50700 miles. Now this has become very annoying and the truck has 55000 miles. He used to be totally right. This submit truly made my day. You can not consider simply how a lot time I had spent for this information. Thank you! I just stumbled upon your site and in accession capital to assert that I get actually enjoyed account your blog posts. Anyway I'll be subscribing to your feeds and even I achievement you access consistently quickly. The system is a mess. I was told that the front a rear transverse valves should be chance, but also I read that could be clean. Help! Thanks Rafael Guevara 507 69985022 Panama I'll certainly digg it and in my opinion suggest to my friends. I am confident they'll be benefited from this website. You know how you can assign the third button on the remote key to unlock the trunk door. Well, mine only does it half way. It almost unlocks it, but when i unlock all the other doors using the unlock button it work perfectly. Any suggestions on how to fix this Notify me of new posts via email. Just like any vehicle, however, this British car needs its regular maintenance in order to extend its lifespan and keep you safe! In this post, we'll talk about everything you can do to craft an effective and reliable maintenance plan for your vehicle. This is because many contemporary models of Land Rovers are luxury vehicles. You should change the oil in your Land Rover once every 3,000 miles. You can change the oil of your Land Rover yourself, or you can take your vehicle in to have it serviced. Once again, these details should be located in your user's manual. You will also want to check your Rover's air filter when you perform an oil change. A clean air filter can dramatically improve the performance of your engine. Your transmission is responsible for effectively powering and moving your vehicle. A faulty or neglected transmission can lead to costly repairs down the road. What's more, transmission issues can devalue your Land Rover and shorten its lifespan. But do refer to your manual for your model's specific mileage. Flushing your transmission means clearing it of broken down fluid. A flushed transmission ensures that your engine can operate in prime condition. However, you can inspect the health of your transmission. In fact, we recommend doing this. You can do this by starting your Rover, leaving it in "park," and inspecting the fluid level and quality using the transmission dipstick. Make sure the fluid is at the proper level and doesn't smell burnt or look dark brown. Check your manual for the recommended tire pressure for your Rover model. Frequently inspect your tires for any notable signs of damage or distress. These include gouges, blisters, bulges, or cuts in the tread itself. You'll also want to get your tires regularly aligned and rotated. This ensures that they wear evenly throughout your Rover's lifespan. These include its battery, brake system, and alternator. Make sure you inspect these parts frequently.

Some corrosion is natural, but excessive corrosion can be a sign of a deteriorating battery. If your brakes are vibrating or acting faulty, take your vehicle in immediately for a mechanic's attention. Keep your manual in your car's glovebox for easy accessibility at all times. If you've lost your

manual, contact your local dealership for a replacement. Wash your Rover often, and be sure to inspect for scratches, dents, and more when you do. You may even want to have your Rover professionally waxed once a year. Consult a local Land Rover professional about best practices for caring for your vehicle. It's also helpful to have contact information for mechanic services in case of an emergency or lastminute repairs. Inspect your tires often and know how to recognize problems ahead of time. We love giving visitors the information they need to take charge of their Land Rover maintenance. Look no further. Offroading is all about jumping into nature Look no further. In this article, we're going to look at what makes a great offroad vehicle and pick 8 of the best offroad vehicles in 2019. Let's find out which is the best one for you. Is it size Torque Clearance All of the above Let's find out what you need to look for when purchasing your next toy. Basically, more is better. The more ground clearance you have, the more easily your vehicle can climb over obstacles. If you can't see well at night, you'll find yourself in trouble. Many offroad vehicles come packed with LED lights to guide you in the dark of the bush. If a vehicle has sold you on everything else but has bad lighting, you can always purchase your own, however. The heavier you are, the more difficult it is to get over obstacles. Lighter vehicles overcome obstacles better, are easier to control on rough terrain, and have a lower center of gravity. If you aren't equipped with offroad tires and a lightweight vehicle, you could end up just spinning your tires.

More torque makes it much easier to ride on rough terrain without feeling like you're destroying your vehicle. The Gladiator has over 7,600 pounds of towing capacity, which blows past Wranglers out of the water. It's got dozens of options for additional features that can make your offroad experience unforgettable. Visit this page to find out more about Jeep's on and offroad capabilities. New features include "Jump Mode", which detects when the Raptor is off the ground, then turns up its compression damping to brace for impact, allowing the Raptor to avoid bottoming out on big jumps. You can adjust the speed then the Raptor takes it from there while the driver focuses on steering. If you set the speed to 1 mph, the Raptor sends power just to the wheels, great for getting unstuck in your travels. Its massive 37inch tires give you all the clearance you could ever hope for. Word on the street is that this thing can cruise at speeds up to 100 mph off road. The 575 hp supercharged 6.2liter V8 engine is somehow going to be upgraded with next year's 707 hp version. The G550 by MercedesBenz has a similar look to its predecessors but there are some subtle changes with this model. But, with the Discovery SVX, some of the offroad spirit of Land Rover still remains. It's got a trucklike build that gives it tons of ground clearance and a huge amount of storage space, for long journeys. The new customizable AWD version of the sprinter comes in at 190 hp with 324 lbft of torque. These numbers probably won't blow an offroad expert away. You can preheat and check the fuel levels remotely, use the interior WiFi hotspot, and employ the incredible driving aid features to make your longhaul trip a good time. The smaller Titan is much better for offroading. The optional Pro4X package gives you offroad dampers, allterrain tires, a radiator skid plate, electronic rear locking differential, and hilldescent control.

There's a little bit of something for everyone in this list, but maybe you're still unfulfilled. Do some of your own research to match your needs with what the vehicle offers. Don't hesitate to buy your offroad vehicle now and ride out 2019 in style. With Jeep, you get the ultimate combination of fuel efficiency and all the offroad muscle of a desert driving machine. You get heavyduty, bodyonframe construction, locking differentials, fourwheel drive, stout axles, and big, sturdy tires. It even started as a farm tractor, so you might say it was born for dirty business. But this hardbodied desert vehicle can carry you through the bumpiest, and sandiest, offroad terrains like a chainsaw cutting through a stick of butter. Pack a spare tire, or two. If you need an emergency windshield or glass replacement while in Arizona, you can get help here. Plenty of tough offroad vehicles can carry you safely through your Arizona desert adventure. Regular servicing and maintenance of your Land Rover Discovery can help maintain its resale value, save you money, and make it safer to drive. Does not cover Series 4 models introduced in May 2009. Take your entire manual with you on every journey. There were 6speed manual or automatic transmissions available, with a transfer gearbox to distribute the power to the front and rear final drive units. Air suspension was fitted to all models bar the basespec vehicles. This allowed for ride heights at each wheel to be varied, to suit the driving conditions. The Land Rover Discovery 3 was available with 5 doors, and 5 or 7 seats. I am looking for a discovery 3 workshop manual. Regards Andre Talk to Mikebob here on the forum, he has rebuilt 2 motors now. Also talk to all the known indies, but please do not have this work done by people who do not know these motors.Nerdy, 2011 Honda Jazz, 1500 Exc. The main reasons for this are that the used Disco 3 offers great value for money, is extremely comfortable, incredibly capable, has a high spec even in the base S model, offers a great drive, was a multiple SUV award winner and has a good looks yet functional design. The benefits far outweigh the negatives, but there are some negatives to consider. It is a heavy vehicle at almost 3 tons, not that youd notice driving it, it has a significant amount of electronics and apparently complicated systems which can make maintenance expensive. However the available knowledge and skill to repair these vehicles outside of the dealer network is significant and continues to increase all the time. So if you do your homework properly and are prepared to learn and understand your vehicle you can enjoy owning a luxury Land Rover at a fraction of the cost of a new one. The base model Discovery S was generously speced with many features standard especially on the older model years. Read some vehicle reviews done at the time of introduction to understand the models and the differences. Firstly it is obviously ideal to find a vehicle with a clean and solid service record, but possibly more important than that is to look at the frequency and quality of these services, regular oil changes at 12000km is the ideal, some model years like 2008 were done at 24000km, this is not ideal and could raise questions about the longevity of the engine. Low mileage is also ideal but again possibly more importantly is the condition of the vehicle, by looking at it and driving it, it should be fairly evident if it has been looked after and treated well.

A Discovery 3 in mint condition should be immaculate, the interior should be clean and undamaged, the exterior and undercarriage should be free from any dents or bashing from off roading. The drive should be smooth and quiet, any noise, clunks in drive train or steering and loose items inside or in engine area should raise some concerns. In addition to the maintenance there are also many upgrades and mods that you can do to your vehicle to make it more usable or increase performance or just make it more reliable minimise some of the complexity. These vehicles had so many features and new technology that understanding it all takes some reading, there is a great summary of all of this at the Discovery 3 and 4 FAQ. The basic frequent service items like changing oil, filters and brake pads can be done quite comfortably by a home mechanic. The basic requirement is to change the oil and filter every 1200km and then the air filter and pollen filter at every and the fuel filter every Have a look at the complete Discovery 3 service schedule for full details of routine maintenance. Also if you have just bought a vehicle and cant verify when or if these items have been taken care of then some people like to get them done as a matter of course.
