HDMI, the HDMI logo and High Definition Multimedia Interface Co., Ltd. The HDD is a high precision  
recording instrument and because of its long recording capability and high speed operation it is a  
very special device As a basic rule, save important content to a disc as backup. Depending on the  
setup environment and handling of the HDD some content may become damaged and play and  
recording may no longer be The HDD is not an everlasting storage device for recorded content. Use  
the HDD as a temporary storage place for one off viewing, editing, or If there is an irregularity within  
the HDD, repetitive strange sounds or problems with picture block noise, etc. may result. Using the  
HDD in this As soon as you notice this type of problem, copy all Recorded content data on a HDD that  
has become unusable is unrecoverable. This does not indicate a problem with this unit. This  
unit Condensation may cause internal When the HDD warms during In the above situation, without  
turning the unit on, let the unit HDD may become damaged. While the unit is on, the HDD is rotating  
at high speed. Sound or This unit records using a VBR Variable bit rate data compression system to  
vary recorded data segments to match video data segments which If the remaining amount of time is  
insufficient, delete any unwanted titles to create enough space before you start recording. Deleting a  
playlist Panasonic does not accept any responsibility for damages directly or indirectly due to any  
type of problems that result in loss of recording or Likewise, the above also applies in a Unit care. The  
precision parts in this unit are readily affected by the Cigarette smoke also can cause malfunction or  
breakdown. To clean this unit, wipe with a soft, dry cloth. Observe the following points to ensure  
continued listening and Dust and dirt may adhere to the unit's lens over time, making it Use the DVD  
lens cleaner not included about once every year, Carefully read the lens cleaner's instructions before  
use.
