You can operate this receiver using the menu on the TV screen when you connect the TV to the HDMI TV OUT jack. When connecting optical digital cables, insert the plugs straight until they click into place. Check the HDMI video formats supported by the receiver. Solid lines show recommended connections and the dashed lines show alternative connections. It is not necessary to connect all the cables. It is not necessary to connect all of the cables. We recommend that you connect the server to the router with a wired connection. Doing so may cause a malfunction. Connect the supplied optimizer microphone to the AUTO CAL MIC jack. 2. Set up the optimizer microphone. Perform step 3 within five minutes, otherwise pairing will be canceled. If pairing is canceled, repeat this step. 3. Perform pairing on the BLUETOOTH device to detect this receiver. Some letters that can be displayed on the TV screen cannot be displayed on the display panel. You can also control this receiver from a smartphone by using the compatible apps. AirPlay This receiver supports AirPlay. A list of available servers appears on the TV screen. To use this function, you need to connect the receiver to the Internet and then follow the guide that is displayed after the following steps. A list of registered controllers appears up to 40 devices. 3. Select the controller you want to set and press. 4. Select the setting you want. Allow Permits access from the controller. If the volume level is still too low, adjust the volume level of the receiver. Note These operations may not be available for certain BLUETOOTH devices. To exit zone operation Press ZONE SELECT on the receiver repeatedly to select the zone you want to exit, then press ZONE POWER. These functions allow communication with Sony "BRAVIA" Sync compatible TVs using an HDMI cable not supplied. You cannot select other modes. SP A Speakers connected to the SPEAKERS FRONT A terminals. The measurement

starts in 5

seconds.http://www.stroysogl.ru/uploads/fck/canon_speedlite_550ex_instruction_manual.xml

The measurement process will take approximately 30 seconds with a test tone. The measurement starts in five seconds. Zone2 for STR DN1060 only When using the Zone 2 connection. Bi Amp When using the bi amplifier connection. Front B When using the front B speaker connection. Level dB Frequency Hz Bass Treble 1. The receiver may play signals at a lower sampling frequency than the actual sampling frequency of the input signals depending on the audio format. This may be useful when you want to watch movies at a low volume late at night, etc. Auto 12bit Outputs 12bit video signals if the connected TV is compatible with Deep Color. 10bit Outputs 10bit video signals if the connected TV is compatible with Deep Color. AMP HDMI audio signals from playback devices are only output to the speakers connected to the receiver. Multi channel sound can be played back as it is. Note You can register up to 5 TV SideView devices. To return to the previous display Press or BACK. To exit the menu Press AMP MENU. The distance between the speaker and the microphone may be too small. Set them further apart and perform the measurement again. Be sure to use a High Speed HDMI cable when you view images or listen to sound, especially for 1080p, Deep Color Deep Colour, 4K or 3D transmission. Use an audio cable not supplied. Adjust the speaker level. Check that the DVD, etc. Press on the remote control repeatedly. Turn off the receiver, reconnect the USB device, and then turn on the receiver. Connect a compatible USB device. The audio file is a multiple track audio file. Some AAC files may not be played correctly. If you use a partitioned USB device, only audio files on the first partition can be played. It may take some time for the receiver to connect to the network after it is turned on. The network settings on the receiver may be incorrect. If the connection failed, set up the network connection again.

Audio content with DRM Digital Rights Management copyright protection cannot be played on this receiver. The track information may have been changed on the server. The receiver itself does not support the Wake on LAN. The BLUETOOTH device you attempted to connect does not support the A2DP profile, and cannot be connected with the receiver. Point the remote control at the remote control sensor on the receiver. Apple, the Apple logo, AirPlay, iPad, iPhone, iPod, iPod classic, iPod nano, iPod touch, and Retina are trademarks of Apple Inc., registered in the U.S. and other countries. All other trademarks and registered trademarks are of their respective holders. Turn the LEVEL to just before the mid point. If you connect a subwoofer with a crossover frequency function, set the value to maximum. Analog Direct A. DIRECT You can switch the audio of the selected input to 2 channel analog input. This function enables you to enjoy high quality analog sources. The level of reflection and reverberation of sound is kept to a minimum, while dialogues and surround effects are reproduced vividly. This sound field makes you feel as if you are really at the recording studio or concert. The front 2 channel source sound is output sequentially from adjacent speakers. settings and the source, there may be no sound output. Check leakage as described below.

The Data Precision 245 The "limit" indication is 0.75 V, so analog meters must have an accurate
lowvoltage scale. The Simpson 250 and Sanwa SH63Trd are examples of a passive VOM that is
suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. See
Fig. A. This receiver features 7.2channel speaker output and delivers up to 165W per channel at 6
ohms. Builtin WiFi, Google Cast, and Bluetooth connectivity allows you to wirelessly connect to
audio sources such as computers, smartphones and tablets. An Ethernet port is also available for
wired highspeed Internet connections. AirPlay technology is onboard for conveniently streaming
music from compatible devices like iPods and iPhones. You can also connect audio sources to the
receivers frontpanel USB. The Sony STRDN1060 is wellequipped for video connections with
component video and 6 HDMI inputs. In addition to 3D and 4K video passthrough, you can upscale
lower resolution video sources to near4K quality. For enhanced system control, you can download
the free SongPal app to control the receiver from your mobile device. The integrated graphical user
interface allows you to intuitively navigate the receivers menu system. Builtin highresolution audio
support allows you to take advantage of dynamic surround sound formats like DTSHD and
DolbyTrueHD. It is also quite common that customers throw outUser manuals are alsoTry Google
