To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later.

Amazon Customer 4.0 out of 5 stars Old one just sat around with a black screen. Minus a star because it took a while to figure out how to make the pictures correct orientation. The frame does it automatically which is a big plus but only if you go in and have pics resized to fit not kept at true size altho easy once you realize and someone who knows their way around technology better probably wouldn't have had the problem. Also it isn't simple enough to delete off pictures not wanted for my little windows of time I have to mess with it. Holding up well with my young children grabbing at it and enjoying it but have only had a month so that could change. But otherwise I have been loving it! Fantastic picture. Easy to setup and use. Great features. Pictures are so clear and bright. We want to add music to play when pictures are on slideshow. We are buying two more of them.
