Each track is assigned a number, enabling you to easily locate the track you want. This system allows the flexibility for the consumer to use any of the above media formats for recording in the same system.

Each title is assigned a title reference number enabling you to locate it easily. A title is composed of one or several chapters. Each chapter is assigned a number to enable you to easily locate the chapter you want. Depending on the disc, chapters may not be labeled. DVD video uses modern MPEG2 data compression technology that enables an entire feature film to be stored on a single five inch disc. This is more than twice as high as VHS and even better than laser disc quality. DVD picture quality is easily comparable to the digital masters produced in recording studios. A highperformance laser is used to change the reflective properties of the recording layer; this process can be repeated more than a thousand times. If it is not finalised after a recording, further recordings can be added to it. Old recordings can be deleted but they can no longer be overwritten. The deleted recordings titles are marked deleted title. Once this process is complete, no further recordings can be added. This means This means that the exact recording time will depend on the material being recorded. Before you start a recording session, check the amount of recording time left on the disc. For analogue TV broadcasts, this usually means mono or stereo, but digital TV programs are broadcasted in multilingual audio channel. You can record multiple channel audio. Copyprotected video includes DVDVideo discs and some If copyprotected material is encountered

during a recording, recording will pause or stop automatically and an error message will be displayed onscreen. You may not sell, lend, or rent them to other people. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision corporation. Reverse engineering or disassembly is prohibited. For maximum protection, repack the unit as it was originally packaged at the factory.

In this case, position the unit away from the TV, VCR, or radio, or turn off the unit after removing the disc. Do not leave rubber or plastic products in contact with the unit for a long period of time. They will leave marks on the surface. If the surfaces are extremely dirty, use a soft cloth lightly moistened with a mild detergent solution. Do not use strong solvents such as alcohol, benzene, or thinners, as these might damage the surface of the unit. If the optical pickup lens and disc drive parts are dirty or worn, the picture quality will be poor. Regular inspection and maintenance are recommended after every 1,000 hours of use. This depends on the operating environment. For details, please contact your nearest dealer. Never mix different types of batteries standard, alkaline, etc.. Do not stick paper or tape on the disc. Before playing, clean the disc with a clean cloth. Wipe the disc from the centre outward. Digital satellite tuners and Digital VHS video recorders are not compatible. HDMI was developed to provide the technologies of HDCP High Definition Contents Protection. HDCP is used to protect digital content transmitted and received. A single USB port can be used to connect up to 127 peripheral devices, such as digital cameras, MP3 players, and removable storage. USB also supports PlugandPlay installation and hot plugging. In other words, the USB host function of this product does not guarantee the compatibility with all of USB devices. Also moves up and down in menus. Pauses playback or recording temporarily. Press during Play mode for fast reverse picture search. Press during Play mode for fast forward picture search. Press again to exit Pause mode. For more details, Refer to One Touch Record OTR on page 46. Composite output and RGB output If a unit has HDMI connection, you can use a HDMI cable as well. Whichever TV connection you use will work with all input sources. To solve the problem, turn off the recorder and then turn it on again.
