Container Version 11. Creator Version 14. Youll find such information in the Manual of your Greenpacket DX250 router. But if you do not have the manual for your router or you do not want to read the whole manual to find the default login information then you can use the quick guide below. To get to the router login page its necessary that you are connected to the router. The default password is admin. Sometimes the username and password doesnt work that we mentioned in the top of this guide.Did you try the following IPs In the list below we listed all known router IPs for the manufacturer Greenpacket. Maybe this will work for you.This can be done easily by clicking on the reset button at the back or at the bottom of your router. If you hold down this small button for approximately 20 seconds, you may have to use a toothpick, then your modem will get restored to the factory settings. What you need to keep in mind is that when you reset your modem, you will lose your connection online. It is therefore better to take an experts assistance in this regard. Select “ Login ” You may change this to any name of your choice.

Select “ Apply ” Click “ here ” or wait 10 seconds for the modem to auto redirect. GreenPacket DX250Router Internal IP Address Open link Voila! You are now logged in! Of course, you can build a strong hash password with special character, numbers, greek and latin. But ultimately you will endup writing it on a sticky and putting it on the router which defeats the purpose.Look for Network Name SSID, this is the wifi name of your GreenPacket DX250 Router. Once you enter the name for your network, you have to enable WPA2PSK encryption on your GreenPacket DX250 router. That’s the strongest encryption standard available for home networks. Keep it 1620 characters and please! don’t use the same password that you used for GreenPacket DX250 router login. You did good so far, Now consider. Bookmarking this page, It always helps Just forget, We don’t even recommend it 6.Security is a continuous process Just keep in mind to change the passwords often or at least once in every 6 months.Time for a bulletin on the fridge, folks. We can remind you though. Enter your email on below. Nope, we’re not spammers! submit Or, in most cases, users find a way to forget them. In either case, look up the “How to Reset the GreenPacket DX250 Router to Default Settings” section below Forgot Password to GreenPacket DX250 Router Incase if you have changed the default username and password of GreenPacket DX250 and forgot it, Please see “How to Reset the GreenPacket DX250 Router To Default Settings” section below How to Reset the GreenPacket DX250 Router To Default Settings Incase if you have changed the default username and password of GreenPacket DX250 and forgot it, It’s more like magic, I’d say. Press the reset button with a pin or something that gets through the tiny hole, and hold it for about 15 seconds! till you see all lights flickering Your GreenPacket DX250 router shall be reset in no time, and you can start from step 1 in this guide to set it back up We are looking for Sponsors.

Modemly helps hundreds of thousands of people every month to setup a safe and secure internet environment. We are looking for sponsors for our site [Read more](#) [How to boost GreenPacket DX250 Wifi and overcome connectivity issues](#)

1. Place the GreenPacket DX250 in a perfect spot The perfect spot does it all; be it romance or your router. To avail the best signal and network connectivity, make sure you keep your GreenPacket DX250 router visibly and not facing the wall or behind the curtains
2. Find a Good Wireless Channel Instead of Auto on your GreenPacket DX250 router Auto channels might fail you once in a while; believe that you're smarter than the GreenPacket router. Find a seamless wireless channel instead of what the router finds automatically. This would ensure that your signal does not interfere with that of your neighbors. Open Command prompt In command prompt type `netsh wlan show all` You will see a list of all wireless networks and the channels being used in your vicinity. This means that if possible, you should consider hardwire using Ethernet cable the devices that tend to consume a lot of bandwidth. Although this can sort of defeat the purpose of having wireless network, but it can actually help your overall network speed of GreenPacket DX250 if you can hardwire the bandwidth hogs.
5. Reboot GreenPacket DX250 on a schedule Here is something important to note. On schedule, folks, reboot your GreenPacket DX250 router. Though routers are built to constantly be running at all times, simple tweak like regular power cycling a fancy way of saying unplugging the power cord and shoving it back up helps with most issues. Rebooting your GreenPacket DX250 can fix Internet connection problems, improve slow moving connections and resolve wireless issues altogether. Try unplugging your GreenPacket modem on a quarterly basis to stay proactive Never reset, always reboot modem. Sony news in your inbox. Download our apps.

A newer version of your browser may be available [Chrome](#) [Chrome Download the latest version](#) [IE Internet Explorer Download the latest version](#) [Firefox](#) [Firefox Download the latest version](#) [Apple Safari Download the latest version](#) Proceed with current browser for now Proceed with current browser for now. Once the power light stops blinking, the unit has been reset and is ready to use. Resetting the router does not reset the firmware to an earlier version, but it will change all settings back to factory defaults. Some GreenPacket routers come with default network names with the name of the manufacturer. We recommend to use a different name because a default name unnecessarily identifies the make of your router, making it easier for attackers to break in. So it's wise to change the administrator password for your GreenPacket DX250 router. When you're deciding on your new password, try to pick a complex series of numbers and letters and try to avoid using a password that can be guessed easily. To enable this feature, enter into your GreenPacket DX250 router the 12character MAC ID of each computer that will connect to your network. Be sure to update this information if you add or remove devices. This may be changed at will by unchecking the corresponding box in the settings. Then your network will not be so easily hacked. However, as a compromise, you will have to enter the SSID every time that you connect a device to the network. This step is not mandatory.

To enable this feature, enter into your GreenPacket DX250 router the 12character MAC ID of each computer that will connect to your network. Be sure to update this information if you add or remove devices. The first benefit is that all the rooms in your house have the same access to the Internet. The second benefit is that you don't want to have your wireless signal range reach too much outside your house, where it can be easily intercepted by cybercriminals. The guide gives important information on setup, safety, and lock use that is important in getting started with your Liberty Safe. To

determine which owners manual is the correct version for your Liberty Safe, locate the safes SERIAL NUMBER. Recent models show the serial in two locations. You may have to register before you can post click the register link above to proceed. To start viewing messages, select the forum that you want to visit from the selection below. Congratulations! You've finally realized the importance of having Broadband Internet and you're ready to connect to the much promised 10Mbps Wireless Internet. The reason is rather clear this is NOT a 4G Broadband modem, but rather a WiMaX IEEE 802.16d Modem. Horace's criticisms of Digicel's Network as per his article Digicel Wimax One Year After Launch aren't so kind, but if you're desperate and they're your only option, then this article's for you. Digicel has discovered what CLARO knew from experience Jamaicans insatiable love for the Internet especially to help their kids makes price no object in buying modems to access the Internet. The reason for this is because Digicel's Call Center is now outsources to Fullgram Solutions, a Call Center located in Kingston that previously handled CLARO's Customers. I worked on that Account from February 24th 2012 to April 1st 2012, a very desperate time during my job hunt here in Kingston, Jamaica. Worse, due to the transmission frequency of 2.5GHz on which it operates, you'll need to position the Modem near to a window that has a clear view of the WiMaX enable Cell Towers in your area, otherwise you'll get lackluster Internet Performance. Bummer dude!! There are several Digicel 4G Broadband Modems on Digicel's website Mary Banana Chips! We're sticking it to Digicel with this one. You'll need Make sure all LED lights are green Alternately run CCleaner to scrub the Browser memory You're gonna need that! In case you delete it by accident, you can always verify this as fact Mary Banana Chips and just surf some Internet Waves. Just remember that traffic peaks after 6am so if you're surfing in the middle of the day expect pages to stall or load slowly.

The best time to go online really is after 959am, when everyone's going to bed and Internet traffic's cooled off. And Remember, whenever you have problems with your Digicel WiMaX modem accessing the Digicel 4G Broadband Network, just buss your fourth pack of St. Mary Banana Chips and it's easy solving from there.
