United Kingdom, United States and other countries. This powerful cleaner scrubs the floor, walls, and waterline and removes unwanted debris. Get a clean pool without the manual work. This powerful cleaner scrubs the floor, walls, and waterline and removes unwanted debris. Get a clean pool without the manual work. Answer The floats are on the arm of the Dolphin. The floats are used to assist the buoyancy of the cleaner when turning on the bottom of the pool and scrubbing the waterline. To adjust the buoyancy, slide the float out on one side of the Dolphin. If the cleaner continues to have issues turning or scrubbing the waterline, pull the opposite float outward as well. Answer The Dolphin requires a standard 120v outlet for power. Answer Dolphin robotic pool cleaners are best used in temperatures between 43 and 93 degrees. Answer No, do not remove, this is not packing material. These help the Dolphin with buoyancy within the pool. Answer No, the indentions on the rings are normal and due to the product settling during shipping. The rings will reshape once saturated with water. Answer The power supply is water resistant but not waterproof. Please cover the power supply if inclement weather approaches. Do not leave the power supply in standing water. Do not allow the power supply to be submerged in the pool. Answer It is safe to leave your Dolphin cleaner in the water when not in use. However, when adding chemicals to the pool please remove the Dolphin until the proper chlorine and PH balance are obtained. Answer The Dolphin is not designed to be used with an extension cord or surge protector.

Answer Not all Dolphins are suitable for infinity pools, please contact Maytronics directly or your local Dolphin retailer for information regarding the models that are suitable for this pool type. Answer Yes, the Dolphin is suitable to use in fiberglass or Vinyl pool surfaces. Answer Maytronics offers several pool cleaners both via brick and mortar stores and via internet dealers that include warranty rights.Answer Dolphin pool cleaners purchased in the United States must be operated in North America in order to retain the warranty rights. Using any Dolphin pool cleaner outside of North America that is purchased in the US voids the warranty service agreement. Answer The power supply unit is an electrical device which must be protected from the elements. When in use the unit needs to remain dry. Do not submerge the power supply unit in water as this will damage the internal components. The more detail you provide for your issue and question, the easier it will be for other Growing DX4 owners to properly answer your question.

Ask a question About the Growing DX4 This manual comes under the category Smartwatch and has been rated by 1 people with an average of a 9.3. This manual is available in the following languages English, Spanish, Portuguese. Do you have a question about the Growing DX4 or do you need help. Ask your question here Growing DX4 specifications ManualSearcher.com ensures that you will find the manual you are looking for in no time. Our database contains more than 1 million PDF manuals from more than 10,000 brands. Every day we add the latest manuals so that you will always find the product you are looking for. Its very simple just type the brand name and the type of product in the search bar and you can instantly view the manual of your choice online for free. ManualSearcher. com If you continue to use this site we will assume that you are happy with it. Read more Ok. DX4 CrossOver achieves new levels in precision and performance where flatness and parallelism are important and is a better vise than our own D40 in every way we measure a vise. With KURT’S commitment, the DX4 CrossOver is destined to become the gotovise for today’s machining

applications. Order yours today, or contact Kurt Workholding to learn more. It is easier to hold our precision location with a single bore then two entire surfaces of a keyway. This bore is also used as a basis for our other features such as stationary jaw parallelism and therefore a more consistent location transforms into a more precise product. It also allows us to put in additional precision holes to fit many grid plates 2”x2”, 40mm x 40mm, 50mm x 50mm without adding additional cost to the final product. This precision allows the end user to have less setup time as the tolerance stack up of the reamed hole and sine key are minimized. An oversized oring is applied to the sine key, which gets compressed as it is installed into the vise, keeping it securely fixed in the vise body.

Order yours today, or contact Kurt Workholding to learn more. Privacy Policy. With KURT’S commitment, the DX4 CrossOver is destined to become the gotovise for todays machining applications. When combined they create an ultraunique strategy for a better vise.Complete refund or credit will be issued for unused and unmarked items returned within 10 days of receipt. Defective items will be either replaced or repaired. You will not see our advertised products at a lower price or we will refund or credit the difference.
