Please try again. Limited time offer. Learn more. Find a comfortable, yet snug fit through the Fit Guide. The included wing tips are optional and for most, best used only when additional security is needed for strenuous activities. Fire TV 4K builtin. Fire TV 4K builtin. Enjoy premium sound, limit background noise with Bose Active Noise Reduction, and get up to 5 hours of music playback on a single charge. Advanced microphones give you handsfree access to Alexa—no tapping required. Echo Buds use the Alexa app to stream Amazon Music, Apple Music, Spotify, Pandora, and Sirius XM. Just ask to skip songs, switch artists, or turn it up while your hands keep air drumming. Just ask Alexa to set a reminder, check your calendar, make a call, or get directions. Or press and hold your earbud to access Siri or Google Assistant from a supported device. Forming a snug, inear seal brings out the best in your music, whether you're at the gym, on the bus, or in the office. For example, with Echo Buds, you can mute the mics with the Alexa app. You also have control over your voice recordings. You can view, hear, or delete them at any time. Learn more. Skills are like apps and help you do things like play Audible audiobooks, request an Uber, place a mobile Panera Bread order, get a guided workout from PopSugar, or meditate with Headspace—just ask Alexa. Find them in the skills section of the Alexa app or visit the skills store. Case 57 x 77 x 29 mm Case 70 g. Actual size and weight may vary by manufacturing process. Carrier charges may apply. Please consult your carrier for information on any fees and limitations that apply to your plan. Alexa voice control is supported on Android 6.0 and iOS 12 or greater.

However, please note that the following smartphones are not compatible with Echo Buds for Alexa voice control. Learn more. Testing was conducted by Amazon in a lab environment with preproduction Echo Buds and charging case and a prerelease version of the Alexa app on both iPhone and Android phones. Prior to testing, Echo Buds and charging case were fully charged to 100% except for quick charge which charged drained Echo Buds at room temperature for 15 minutes. Echo Buds were set at 50% volume. Music playback testing was conducted with a preset music list, noise reduction and handsfree with Alexa enabled, until the first earbud stopped playback. 20 hour music playback testing consisted of recharging the drained Echo Buds to 100% for 4 successive discharge cycles on the Echo Buds. Call time testing consisted of discharging Echo Buds on a test phone number with a test track playing on both the caller and receiver sides with handsfree Alexa enabled, until call audio stopped on the first Echo Bud. Additionally, 16 hour call time testing consisted of recharging the drained Echo Buds to 100% for 4 successive discharge cycles on the Echo Buds. Learn more about Alexa accessibility. Optional 1year, 2year, and 3year extended warranties will be available for U.S. customers and sold separately. Use of Echo Buds is subject to the terms found here. Visit the Alexa Privacy Hub to explore how Alexa and Echo devices

are designed to protect your privacy. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Honest Reviewer 4.0 out of 5 stars Big fan of this because; One, less likely to get stolen, and two, they're discrete looking. I'm not a fan of being a walking billboard on tech that I already paid money for.

As Amazon requests, you need to clean them after you take them off. I try to trick this feature, but the earbuds weren't fooled. The sound isn't bloated, has decent bass, and overall has decent balance tones. Note, this isn't a noisecanceling but it blocks out smaller sounds like the humming sound when your refrigerator turns on, or the sound of cars going by if you're inside. I found this feature the best when you're driving. Tested this out and it works fine. The response and the receiving end didn't have any issues. I believe with this you can modulate your voice so Alexa can be able to recognize your voice better when you're in a loud environment. What I like about the battery layout specifically is it will show you when you have a lot green light, an all right yellow light, or a poor battery life red light. Even with the soft silicone cover, I honestly didn't feel the need to wear them as the earbuds stick pretty well in your ear or at least in my ear. Depending on your ear size, some may find the fit uncomfortable. My advice is to read what others have to say to get an accurate level. Just walking on the streets, with average traffic noises, Alexa wasn't able to hear my voice. I had to put a lot of effort into getting Alexa to work when facing the outside world. You have to either ask Alexa or use the app. From my experience, this feature will not help you when you're on a plane. I wish they created an offline Alexa so simple tasks such as increasing the volume can be performed. It's cool that there is a quick charge on the case, but if you forget to charge the case then you're pretty limited with time. This is why Alexa needs to be connected online to be used. All interactions go to the cloud because, like the Echo, Alexa is always listening. It only happens for a couple of seconds, but I notice it enough to make a note and see if anyone else has the same issue.

At a low volume level, the quality of any sound becomes muddy while at high levels weren't impressive at all. To summarize, these earbuds fit without any wobble, all of Alexa is right in your ear, the noise reduction software does its job well, and it has a great microphone setup. I respect that there are no logos on the buds themselves and to be able to have a case to keep your earbuds charged on the go is right on point. But to compete with Apple or Samsung, sadly I don't think so. You have to allow Alexa to be on all the time, which reduces an already weak battery system. To be honest I felt these earbuds could be worth a little less than what they're asking. Still good earbuds, but I felt the sound isn't anything to brag about. If you don't want to afford the pricing of Apple, Google, or Bose earbuds, and you hate the reviews of Samsung earbuds, then this is worth it. Just be aware you must enjoy the earbuds with the use of Alexa. If you don't want that, then these are not worth the price. Overall Not the best in overall quality but the best in establishing Amazon's Echo in earbud form. Hope I was a help to you. Love, Honest Reviewer I'm used to things being a little janky but functional. That describes the original v1 Kindle, but I always felt like the product was working. Like I was getting the intended experience from it. These things are not ready for wide release. Every time I interact with them, they're misbehaving in a different way. Why does the case light only blink red, no matter the charge. Why does one bud or the other its random! lose charge more quickly during each use. Why is it that sometimes I have to remove the buds from my phones Alexa app, then go through repairing. Why don't double taps work more than half the time. Why do I sometimes hear the whispers of long dead relatives come from the ear buds. Mom Is that you AND WHY do these echo buds start to feel heavy the longer you wear them. How does that work I don't know! Its a mystery!

Alexa in my ears Sounds convenient! These could not be more disappointing. Amazon should have spent a considerable amount of time polishing out the bugs in these ear buds before releasing them.

The number of issues I have with them is just unreasonable. They don't charge evenly in the case. Left bud will be at 18%, right at 99%. Obviously poor charger connections in the case. The sound is PATHETIC. These things are so quiet it's a joke. No volume controls in the Alexa app like they have for other sound devices. And the noise canceling Doesn't work at all. Passthrough Basically just amplifies all outside noise so you feel like you're wearing hearing aids instead of headphones. The buds do not fit properly. They do not offer large enough tips. Period. I'm a 5 ft tall petite female and these things fall right out of my head with largest tips and wings in. Within 20 minutes of having them in my ears hurt so much I can't even keep them in my ears anymore. Pretty sure the smaller tips are made for children. The touch gestures are idiotic. You try to grab the bud falling out of your ear and it thinks you're using the touch gestures, but when you're actually trying to use the touch gestures the buds ignore your touch. Like they're laughing in your face. Can't share a bud with someone. If each person has a bud it won't play music in one bud even if you're standing right next to each other. Multiple times they have just flat out stopped playing a song right in the middle of it for no reason. One of the most annoying problems These buds do not function in tandem with any other Amazon devices which is beyond asinine. Please do yourself a favor and do not waste money on these pieces of trash. I have nothing positive to say about them at all. I'm returning these overpriced pieces of junk. As Earbuds go they sound pretty good and are pretty comfortable, but the way they work is not good. The issues I keep having are 1.

They say connected to BT but will not work, or the audio side does not connect. 2. The BT connection keeps dropping audio which is very annoying and beats the point of having these. 3. The Buttons touch are most often unresponsive, or select the wrong thing. 4. When you ask for Alexa, you have to pause until she responds before you can tell her what to do. 5. The graphic equalizer does not respond to what it should. I wanted to have less bass, but it did not change. 6. They also make a static like click when they engage sound for some reason. This reminds me of getting the Echo Auto. Nice idea, but at first was rushed out to people before all the bugs were ironed out.
