Its Sonys first robotic camera to offer the quality of three individual mega pixel CCDs for brilliant resolution. With its E Flip function for desktop or ceiling mount flexibility, the BRC300 is ideal for use in a wide range of remote video shooting applications such as houses of worship, distance learning, corporate training, and cable TV broadcasting. The BRC300 comes equipped with a card slot that accepts optional interface cards, enabling the BRC300 to be integrated into every kind of system from SVideo to RGB, iLINK DVCAM interface optional card planned to be available soon, SDI or even fiber. In addition, two remote control interfaces VISCA protocol are available to provide additional expendability and flexibility for users remote shooting needs. \ Features 169 Precision Technology and Wide Angle of View in 169 Mode A sufficient amount of pixels are used to reproduce high resolution images in the 169 aspect ratio. The BRC300s Mega Pixel CCD enables an even wider angle of view in the 169 mode. With the RS232C connection, maximum cable length can be extended to 15m 50 feet, while the RS422 connection extends this further to 1200m 4000 feet. MultiInterface Card Slot The BRC300 is equipped with a card slot that can accept optional interface cards. DVCAM

interface optional card planned to be available soon, SDI or even fiber. Various Optional Equipment Optical Multiplex Unit BRU300 this unit converts noncompressed digital raw data from a camera with the optical multiplex card into any video output and has two interface card slots.
