Your outdoor power equipment was built to be operated according to the rules and instructions for safe operation which are contained in the operators manual and on the machine itself. Read and follow all instructions in the manual before attempting to operate your outdoor power equipment. As with any type of power equipment, carelessness or error on the part of the operator can result in serious injury. Your machine is capable of amputating hands and feet and throwing objects. Failure to observe the safety rules and instructions, both on the machine and in the Operators Manual, could result in serious injury or death. Due to the size of the Operators Manual, some Operators Manuals are broken down into two or more segments so that the entire Operators Manual can be downloaded easily. It is very awkward to reach the dipstick to check the oil and there is no way to get a funnel or an oil bottle to the opening to add oil. It has a plastic carburetor that clogs constantly. I've cleaned the jets and it runs for half my very small city yard and

dies. There are tons of videos of this same issue on you tube. This is a rugged, smaller mower perfect for small trimming after mowing with a tractor. I have very steep hills on my property, this mower works great on them. The lawn mower starts and runs very well. The best feature of the mower are the adjustable wheels that adjust the height of the lawn mower. I am tall 68 and this is the best lawn mower that I have purchased due to the variable height adjustment. Starts easy every time! And, after all these years, it still runs like it is only one year

old.<http://polymer-consulting.com/pic/crown-24x6-manual.xml>

It is so reliable, I probably will not have to purchase a new mower in my lifetime. All I do is change the oil, spark plug, and air filter annually. The lawnmower blade is changed twice a year, halfway through the season. I have replaced the wheels this year. Never have had a problem Were here to help. Just Ask Troy.
