SP4 Series;SP5 Series;SP6 Series. BX5 Series. Please upgrade your browser or activate Google Chrome Frame to improve your experience. Like your car, Air Conditioners and heaters need regular service and maintenance to improve your chances of efficient and effective operation. Maintenance will drastically reduce the chance of a break down and will also prolong the life of your investment. By getting a service you will also be reducing your energy consumption which in turn save you money in the long run. We do perform other important checks and address issues as we find them. Available in manual and automatic models, each controller is easy to read, unobtrusive and technologically advanced, without being unnecessarily complicated to use. Its that simple. In manual mode, you set your own temperature, then leave the rest to the Networker. It will maintain the temperature you have chosen, until you choose to turn it off. In auto mode the Networker allows you to preset temperatures and times to turn the system on and off. This means that you can wake up to a nice warm house in winter. The Networker is designed with an easytouse rotary dial, an easytoread LCD screen and is backlit using Electro Luminescence EL technology, making the screen easier to read in poorly lit areas or at night. Whether in heating or cooling mode, the Networker can be programmed to turn off after you've gone to sleep giving you comfortable sleeping conditions. Two different on and off programs can be set for each day of the week. Please upgrade your browser to improve your experience. No. 30 Network Drive. Carrum Downs VIC 3201Get a plumbonline

This unit replaced our old Brivis Buffalo, which worked well for just over 20 years. Brivis sent a technician who replaced the controller, but the issue continued. On occasions the heater would not turn off, so had to be reset again. Last time, it switched itself off and I had to reset it numerous times to get it started again. Just recently, a technician visited again and replaced some. Read more parts. Were now hoping this will resolve the issue. Rinnai has been very good in the way it has addressed our concerns, and the technician they sent Greg was excellent. Whilst its never ideal to have issues with a product you purchase, its great to know that the supplier stands by their product and offers very good customer service. Purchased in April 2019. Build Quality Noise Level Safety Value for Money Room Type Whole House Smells of Gas No See all answers Like Share More 1 comment Rinnai A. Brivis 2 weeks ago Hi Gavin, Thanks for the review.. Read more. We are pleased to have resolved this matter for you. Rinnai Australia pride themselves in having superior products and ensuring that our customers are satisfied with them and the service we provide. Thanks. Rinnai Australia Like Report Similar opinion. Write a review on ProductReview.com.au ! David Gippsland, VIC Air wasn't as hot as the Buffalo 20 when the

heater was first installed, but being an engineer I know that the more airflow passed over the heat exchanger the more heat is pulled off it.

This extra air spreads the energy taken from the heat exchanger further therefore resulting in colder air, however you still have more energy being delivered to your house, it's actually pretty simple. People clearly just like to complain. If they read more bother to look in the manual for the heater you can easily adjust the duct temperature, which I did. Also upgraded my controller to the one with the dial so I can program it to come on and off and change to different temperatures at different times of the day and days of the week. I think it is brilliant and wouldn't hesitate to buy another one!! One downside is that it is a bit rattly, if you have the choice install it near your laundry or bathroom or toilet, not your bedroom. I used that foam tape you can get from Bunnings to put between the lid and outer body, that quietened it down significantly. Purchased in May 2019. Build Quality Noise Level Safety Value for Money Heating Speed Temperature Consistency Smells of Gas No See all answers 1 like Share More 1 comment Rinnai A. Brivis 11 months ago Hi David, We are pleased to hear your Brivis Buffalo Ducted Heating System is exceeding your expectations and has reduced your gas bills. Read more. Rinnai Australia Like Report Similar opinion. Since it's been in with the larger air vent it hasn't missed a beat and it's quieter. Purchased in June 2019. As a result the heater didn't work and we had no heat over Easter and for the three weeks it took to get a service person to attend. The service technician found that the fault was due to a faulty PCB or Motherboard. Thankfully it was under warranty otherwise it would have been very expensive. I had a Brivis Buffalo which worked flawlessly for over 20 years this one fa. I have tried for over two weeks to get a response via email without any success. Called their Customer Service number today, after waiting finally spoke with an unhelpful, uncaring person who referred me to email another department. Date Purchased Aug 2014 4 likes Share More Similar opinion. Write a review on ProductReview.com.au ! AudiOwner Melbourne 13 reviews 14 likes Second day the heater stopped producing heat. Called up Brivis technician for check up. He said everything is fine, didn't check the heater at all just said everything works fine and I need to get the heater upgraded for a stronger one when this one was recommended for my single story house. After a week called up a private heater specialist. He opened the heater up and he found unit to have factory faulty supply air sensor He told me he used to work for Brivis for 30 years but they suck. Read more ed every worker and got cheap Chinese people to save money that have no clue what they are doing. Avoid the headache, customer service is a pain in the posterior and you won't get a refund even if it's under warranty. Date Purchased Jul 2016 2 likes Share More Similar opinion. Write a review on ProductReview.com.au ! Reg It was a very reliable appliance. When it was no longer serviceable I had it changed over to a BX520. It works well just like the old one. When I get services from the company the service guys are all experienced and of course they know all the error codes. What some people don't tell you is that they just put in a replacement heater as cheap as they can and then the wife asks for a few more ducts, so they put them in too.

They don't care when the technical guy tells them it will be undersized. Read more zed they just put them in. I'm OK because I'm a technical guy, but some people have no idea, choose the cheapest solutions and then go crook because it's not sized right. Date Purchased Apr 2014 2 likes Share More Similar opinion. Write a review on ProductReview.com.au ! Dane This heater is hopeless. Cannot get it up to 21 degrees in winter. May be claimed to be more energy efficient per hour but it has to run

much, much longer to increase the temperature by each degree, consequently much more costly to run. The installer came back and checked the temperature settings and fan speed which were both OK. Now stuck with this model which hopefully will fail within the warranty period. Be warned do not buy a Brivis BX520 Date Purchased Jul 2016 3 likes Share More Similar opinion. Write a review on ProductReview.com.au ! Martin C We cant get it up to 20 degrees on a cold day and we get constant error messages which require us to reset. Customer service cant even tell us what the error code means. This is the 4th callout in 6 weeks and we are asked to wait a week. The next call will be to consumer affairs. Do not buy a Brivis !!!! 3 likes Share More Similar opinion. Write a review on ProductReview.com.au ! Other Gas Heaters Previous Regency FG39 4.9 10 Omega Altise Lancer 3.9 10 Paloma PJC15FR 5.0 1 Rinnai Enduro 13 4.4 9 See all Gas Heaters Next Marek Dr But it is a new standard for Brivis warranty services in winter in Melbourne. Ive just replaced my old Buffalo20 unit. It was working 23 years every season with only two service calls Never ever will recommend this brand to any one. What happen with the old Brivis and 3 day service. Pensionier have to wait two weeks in cold for warranty repair. 4 likes Share More Similar opinion. Write a review on ProductReview.com.au ! If you have an existing Brivis Buffalo system, you may or may not need to replace the base unit. Depends on its condition. Like Report Rinnai A. Brivis 1 week ago Hi Mike, Thanks for the question. The Brivis Buffalo BX520 cannot be spilt, the product is an external heating unit. Please contact our technical helpdesk for further information on 1300 555 545 option 3. Thanks, Rinnai Australia. Like Report Michael asked 3 months ago Buffalo BX520 Hi just had a bx 520 installed. It takes over 2 hours just to warm my house from 17 degrees to 20 degrees. The house is a small 3 bedroom house. I don't understand why it takes so long is there wrong with the heater. Thanks Michael Like Share More 6 answers David 3 months ago Good morning Michael, Have a look at the manual that came with the heater, it shows you how to increase the air temperature and the airflow if you have the networker controller the one which has a dial which can turn. If you only have a simple controller, get the installers back who will have one and they can increase the temperature and airflow for you. Most installers are really lazy and cant be bothered to setup the heater for each house they install a heater into. David Like Report Michael 3 months ago Hi David I do have a network controller and iv looked at the manual but cant see where i can increase the air temperature. Please help. Michael Like Report Rinnai A. Brivis 3 months ago Hi Michael, Thank you for the question. We would recommend speaking with our Technical Helpdesk, who can be reached on 1300 555 545 option 3 for assistance and troubleshooting. Thanks Rinnai Australia Like Report View 3 more answers Rose L. asked 4 months ago Buffalo BX520 My newly installed bricks buffalo bx520 just did not start this year even tried so many times on and off power and gas switches, has electricity and gas but just no air come in, the heater did not run at all, not sure what was the issue.
