Ft Package list Host 1 Power cord 1 information 1 Remote control 1 Ozone plate 3. SQ0026 Using an Activated Carbon filter and an Ozone generator you may be able to now remove smoke not only while it's in the air but also after it has settled into your walls, roof, carpets and furniture. Ground in

smoke odors that have been there for many years may be eliminated for good. Same with pet, cooking, paint and any other kind of odor you may meet. Stage 1 Carbon Filtration Quickly removes smoke from the air and scrubs 99.99% of micro particulate as small as 0.3 microns from the air. Stage 2 UV C Sterilization Ultraviolet light kills micro life forms as well as bacteria, mold spores and viruses. Stage 3 PCO Cell Technology A photocatalytic filter collects harmful micro life forms as well as bacteria, mold spores and viruses after they pass through the UV C sterilizer. Stage 4 Dual Negative Ionization Quickly and effectively remove smoke from the air. Both the RF and needle point emitters attract smoke molecules, dust, bacteria and bacteria causing them to gather mass till they're heavy enough to drop from the air. Stage 5 Ozone For stubborn ground in smoke odors. Ozone is generated and emitted as the most efficient killer of smoke, odor causing and health harming bacteria, mold, mildew and other micro life forms. APUZLADB2 Hypoallergenic Air has produced the Air Angel just for families with kids and or pets to protect rooms from bacteria, viruses, aeroallergens, and harmful pollutants in the air and on surfaces. AA250W They're believed to produce biochemical reactions that increase levels of serotonin, which may help relieve stress and increase energy. Anions increase the flow of oxygen to the brain; ensuing in higher alertness, decreased drowsiness, and more mental energy. They also protect against bacteria in the air, ensuing in decreased irritation caused by inhaling different particles that make you sneeze, cough, or have a throat irritation.

This negative ion air purifier for your home or office generates 1,236,000 anions per cubic centimeter, recharging your mind and body while eliminating odors, dust, and pollen. UP3D12 It employs a fan of applying the dragonfly wings of form, and realize the sound reduction by the wind flowing smoothly. It'll deliver a soft breeze in the room. Also to 32 levels of air volume modification, more equipped with a high power operation to strengthen the wind. Easy touch operation it's possible to change flow rate. Also, ion mode, watch function that may be operated set of plasma cluster ion, illuminance sensor, it's equipped with like child lock. It's the most powerful movable ozone generator available. It was intended to deodorize and sanitize big spaces and eliminate the most serious odors caused by mold, mildew, tobacco, fire and smoke, water and flood damage. OS12500 PureIon 630285 Pro It's the 1st and only mix ozone generator and UV air and may be used to eliminate odors, bacteria, and viruses at a high rate in occupied spaces, with the ozone off. To achieve this novelty, we took our top rated UV model and added an off choice to the variable ozone output, another 254 NM UV C bulb, and a charcoal filter features never before used on an ozone generator. It's really a breakthrough in ozone technology and the only professional grade ozone generator that may be used in occupied spaces. OS3500UV2 Brookstone PureIon Pro Will include Bulb, Magnetic Mounting Bracket, 24V Power Supply, UV C Clamp, Mounting hardware, installation information, UV C Safety Label for channel. This matter is before the Court on defendant D M Sales, Inc.s Motion to Dismiss Plaintiffs Second Amended Class Action Complaint doc. 100. The Motion has been briefed and is ripe for disposition.

<https://www.micromegamondo.com/images/compaq-presario-cq60-419wm-manual.pdf>

A hearing on plaintiffs Motion for Class Certification was conducted before Magistrate Judge Cassady on April 27, 2006, and that motion has been taken under submission. This Court is now called upon to assess D Ms jurisdictional status. Defendant D M was not named in the Complaint, but was initially brought into the case by defendant Brookstone Stores as a thirdparty defendant on September 20, 2005. See doc. 23. Plaintiff followed by submitting a First Amended Complaint doc. 52 in November 2005, naming D M as an additional party defendant. Almost five months later, D M moved to dismiss plaintiffs claims against it for lack of personal jurisdiction, as well as various

claims specific defects. On May 24, 2006, the undersigned entered an Order doc. 175 determining that D Ms personal jurisdiction defense was not waived or abandoned by virtue of the delay in asserting it, and authorizing a deposition of D M to afford plaintiff a reasonable opportunity to investigate the jurisdictional allegations. Following that deposition, Matthews and D M supplemented the record as to the Rule 12b2 issue with some 43 pages of supplemental briefing and 26 additional exhibits. II. Legal Standard for Personal Jurisdiction Defense. Where a district court in its discretion decides a personal jurisdiction issue without an evidentiary hearing, it is the plaintiffs burden to establish a prima facie case of personal jurisdiction over a nonresident defendant. Defendant D M seeks dismissal of this action for lack of personal jurisdiction, in addition to asserting various grounds for dismissal of particular claims for failure to state a claim upon which relief can be granted, pursuant to Rule 12b6, Fed.R.Civ.P. D M maintains that specific jurisdiction is improper because there are no allegations tending to show a relationship among Matthews, D M, the Complaint, and the State of Alabama. Based on information secured during jurisdictional discovery, Matthews disagrees.

The personal jurisdiction issue must be tackled first because this Court cannot rule on D Ms other arguments if personal jurisdiction is lacking. See *Posner v. Essex Ins. Co.*, 178 F.3d 1209, 1214 n. 6 11 th Cir. 1999 federal court confronting both Rule 12b2 and Rule 12b6 motions should consider personal jurisdiction issue first because court without personal jurisdiction is powerless to take further action. The formatting requirements should be heeded in future submissions to this Court. A. Relevant Facts. Plaintiff argues that the undersigned should decline to give any weight to the Affidavit of Christopher Lozzio submitted by D M as Exhibit 2 to its supplemental brief. Far from sounding in cursory legal conclusions that simply parrot a longarm statute and declare that it does not apply, the Lozzio Affidavit proffers specific facts about the geographic scope of D Ms corporate activities. As such, the undersigned finds that the Lozzio Affidavit is distinguishable from that at issue in *Posner*, as it is not limited to the conclusory denials that motivated the *Posner* ruling. The Lozzio Affidavit may be of limited utility, because of its emphasis on Lozzios personal circumstances, rather than those of D M, but it certainly is not devoid of utility. Notwithstanding plaintiffs objection, the Court will give this affidavit such weight as is appropriate. Although not originally named as a defendant, he became enmeshed in this action as a thirdparty defendant when Brookstone Stores filed a ThirdParty Complaint doc. 23 alleging indemnity and breach of warranty. Plaintiff followed by filing a First Amended Class Action Complaint doc. 52 naming Lozzio as an additional party defendant with respect to her claims, as well. In December 2005, however, Brookstone Stores took a voluntary dismissal of its thirdparty claims against Lozzio after the latter filed a Rule 12b motion challenging personal jurisdiction. See doc. 57.

sk-developers.com/wp-content/plugins/formcraft/file-upload/server/content/files/162731e380c39d---briggs-and-stratton-log-splitter-manual.pdf

Undeterred, Matthews continued to press her claims against Lozzio until, after a period of jurisdictional discovery, she consented to dismissal without prejudice of all claims against him, apparently because she conceded that his jurisdictional objections had merit. See doc. 79. Thus, Lozzio is no longer a party to this dispute. L, at 1; Plaintiffs Exh. P. Lozzios testimony unequivocally refutes that description of what D M did, and jurisdictional discovery apparently did not disclose any other evidence at least, none set forth in plaintiffs 18 supplemental exhibits that D Ms function was anything other than acting as an intermediary between VisionTac and Brookstone. Although the evidence is taken in the light most favorable to Matthews at this stage of the proceedings, this discrepancy is not material to the legal issues presented in D Ms Rule 12b motion. Matthews contends that the exercise of personal jurisdiction over D M is constitutionally permissible under both general and specific jurisdiction theories. Each will be considered in turn. 1. General Jurisdiction. Although Matthews points to no evidence that D M representatives ever set foot in

Alabama, attempted to make business contacts in Alabama, or transacted any business directly with anyone in Alabama, she nonetheless maintains that D M is subject to general jurisdiction because of its sale of LumiPure air purifiers and humidifiers. Streamofcommerce theory is a basis for asserting specific jurisdiction, not general jurisdiction. In other words, if Matthews were suing D M in Alabama because of an air purifier that she had purchased in Alabama and that D M had placed in the stream of commerce, then this streamofcommerce nexus might well support exercise of specific jurisdiction over D M in this forum. But Matthews purchased her air purifier in Georgia, not Alabama, so a streamofcommerce theory would, at most, support the exercise of specific jurisdiction over D M in Georgia.

Thus, streamofcommerce theory cannot establish the requisite jurisdiction over D M in this forum. A purely passive informational website such as that operated by D M lacks jurisdictional significance. Nor does plaintiff provide any law to counter the authority holding that maintaining a nationwide tollfree telephone number, in connection with a passive Internet site, does not create general jurisdiction. And plaintiffs suggestion that D Ms alleged training of thirdparty representatives in Maine and Massachusetts to staff the tollfree customer service line somehow creates general jurisdiction over D M in Alabama fails because the cited deposition page makes no reference to any such training and, even if it did, the Court perceives no link between such conduct and a general jurisdiction analysis. To hold otherwise would be to declare that operation of a website and a 1800 number automatically subjects a company to general personal jurisdiction in every state of the Union. And the streamofcommerce notion that represents Matthews best hope for personal jurisdiction fails because case law confines that theory to specific jurisdiction and none of the units placed in the stream of commerce by D M are alleged in the Complaint to have harmed Matthews in Alabama. 2. Specific Jurisdiction. The Second Amended Complaint charges D M with causing injury to Matthews a Georgia citizen and resident in the State of Georgia by breaching warranties in connection with the sale of goods in Georgia. Nothing in the Second Amended Complaint alleges that D M wronged Matthews in any way in Alabama, so this theory of specific jurisdiction cannot provide the requisite analytical hook for haling D M into court in this forum. Second, Matthews argues that the requisite specific jurisdiction is created by Count VIII of the Complaint, which alleges a state law conspiracy cause of action against all defendants. See *Ex parte United Ins.*

After all, it is undisputed that she is a Georgia citizen who purchased her air purifier from a Brookstone retail store in Georgia, and later exchanged that air purifier for another unit at a Brookstone retail store in Georgia. Matthews Dep., at 910. Plaintiff does not allege that her conspiracy claims against defendants rest on any overt acts in the State of Alabama. Plaintiffs conspiracy claim does not hinge on anything that any defendant did or may have done in Alabama. To be sure, other putative class members conspiracy claims might involve overt acts in Alabama e.g., if they purchased the allegedly offending product in Alabama or if a conspirator delivered that product to Alabama. By all appearances, plaintiff does not contend that she has incurred damage by anything that defendants did or failed to do in Alabama; rather, her alleged injuries arise from an isolated retail transaction in Georgia, and plaintiffs injuries were allegedly caused by defendants, none of whom are based in Alabama. Under the circumstances, the Court is hardpressed to understand why no defendant sought dismissal under Rule 12b3, Fed.R.Civ.P., given the lack of any apparent nexus between the forum state and this dispute. Instead, Matthews argues that she need not satisfy the overt act requirement as to D M because defendant Brookstone Stores has not contested personal jurisdiction, such that conspiracy jurisdiction may be exercised over all coconspirators because of Brookstone Stores overt acts. Plaintiffs Supp. Brief, at 22 n. 8. This bewildering contention fails on several levels. Plaintiff misapprehends the nature of D Ms overt act objection. The point is not that plaintiff has failed to allege that D M engaged in an overt act in Alabama, but is instead that plaintiff has failed to show that any alleged conspirator committed such an overt act in Alabama that harmed her.

The wrong of which Matthews complains did not rest to any extent on any acts committed by any conspirators in Alabama. Furthermore, Matthews improperly conflates Brookstone Stores failure to file a Rule 12b2 motion into evidence that Brookstone Stores committed an overt act in furtherance of the conspiracy in Alabama. Brookstone Stores could not possibly have prevailed on a Rule 12b2 motion, not because there is evidence that it committed overt acts as to Matthews in Alabama there is none but because it operates three retail stores in Alabama, which is exactly the kind of continuous and systematic contact that establishes general jurisdiction. Simply put, then, conspiracy jurisdiction requires an overt act in the forum state. For purposes of Matthews claims, no overt acts are alleged to have been committed in furtherance of the conspiracy in Alabama. Because the Second Amended Complaint fails to plead with particularity any overt acts within Alabama taken in furtherance of defendants alleged conspiracy to mislead plaintiff a Georgia citizen into purchasing an allegedly worthless air purifier from Brookstone in Georgia, plaintiff cannot secure specific personal jurisdiction against D M on a conspiracy theory. For all of these reasons, the exercise of specific jurisdiction over D M is improper and unwarranted in this action. IV. Conclusion. For all of the foregoing reasons, the Motion to Dismiss doc. 100 filed by defendant D M Sales, Inc. Plaintiffs claims against D M are dismissed without prejudice for lack of minimum contacts with Alabama. See Posner, 178 F.3d at 1221 instructing that dismissal for lack of personal jurisdiction must be without prejudice, so as not to preclude other litigation on the merits in other jurisdictions. Casetext, Inc. and Casetext are not a law firm and do not provide legal advice. Please check your inbox, and if you can't find it, check your spam folder to make sure it didnt end up there. The battery must be However, there Operation is subject to the following two conditions Cet appareil numerique de la classe B est conforme a la norme NMB003 du Canada. I do have a question as to why, after one sides water is depleted, it doesnt look like the other one starts being used. I looked up the manual online, but didnt see anything about that. Verisign. Americans spend hundreds of millions of dollars on furnace filters and air cleaners each year. Though some consumers are simply trying to bring a little extra freshness into their lives, many others hope that their investment will help relieve their asthma or allergies. If you've ever shopped for an air cleaner or if you've ever idly flipped through a SkyMall catalog you've undoubtedly seen ads for ionic air purifiers, devices that take an unusual approach to clearing the air. Instead of relying on fans to move air through filters, the machines release a steady stream of negatively charged ions that electrify the bits of dust, dander or other flotsam. The airborne particles pick up the negative charge and become strongly attracted to positively charged collection plates inside the machine. In many cases, they also become attracted to other charged surfaces such as walls, table tops and TV screens. Except for a few models that use fans to help suck in the charged particles, most ionic air purifiers work silently. And, as ads are quick to point out, the devices generally don't have any motors or moving parts, and there are no filters to replace. There's another thing that separates ionic air purifiers from other technologies To varying degrees, all ionic air purifiers release ozone, a potential pollutant. A 2006 study by researchers at UC Davis found that one popular brand, the Ionic Breeze Quadra, released about 2.2 milligrams of ozone per hour, or about as much as a constantly running photocopier. Ionic purifiers shouldn't be confused with ozone generators that are marketed as "air cleaners.

" By design, these devices can release 50 to 200 milligrams of ozone per hour. Ionic purifiers are sold at drugstores, at department stores and via the Internet. The wellknown and heavily advertised Ionic Breeze line is one of the cornerstone products of the Sharper Image, the highend gadget store. The claims According to the Sharper Image website, the Ionic Breeze is "proven effective at reducing airborne allergens and irritants with no fan, no motor and no noise." The Heaven Fresh website says that its purifiers can provide relief from "asthma, bronchitis, hay fever and other respiratory diseases." Heaven Fresh also claims that the ozone emitted by its machines helps clean

the air. Without fans, he explains, they can't collect airborne particles from more than a few feet away. And when even small amounts of dust enter the device, the plates inside quickly lose much of their power to attract more particles. Meanwhile, the charged particles that stick to walls or TV screens haven't left the room and can always billow up again to cause trouble. The ozone released from the devices is another dealbreaking shortcoming, Sublett says. "Ozone is a pollutant and an irritant. Even small amounts are too much." People who use several units at a time are especially likely to get an ozone overload, he says. One of Sublett's patients noticed a great improvement in her breathing when she turned off the six ionic purifiers in her home. The California Air Resources Board recently banned all devices that create an ozone concentration of more than 50 parts per billion, starting in 2009. Under normal conditions, ionic purifiers as opposed to ozone generators would fall below that threshold, says Jeffery Siegel, an assistant professor of civil, architectural and environmental engineering at the University of Texas at Austin who has studied the devices in laboratories as well as his own bedroom.

Still, he says, the new standard is misleading because even products that release small amounts of ozone could easily reach that concentration in small, poorly ventilated spaces. Sublett says people with asthma or allergies should consider installing highefficiency particulate air HEPA filters in their heating or cooling systems. The ultrafine mesh on these filters traps all sorts of irritants that would otherwise circulate through the home. Is there a consumer product you'd like the Healthy Skeptic to examine. Yes, he says, it's really as bad as you've heard. Keep exploring to find your perfect deal. You never know what you'll find next. The compact unit boasts 5 cleaning speeds, including Whisper Quiet for the bedroom, that use as little as 10W per hour. Theres even an Ion Boost feature that fills the air with negative ions to help lighten your mood and inspire mental clarity. Best of all, its permanent filter washes easily in the dishwasher.
