One of the common problems with the SANYO SFP101N mechanism is that the small cogwheel on the Sled motor wears to a point where a clicking sound can be heard during disc play due to the fact that the motor no longer correctly meshes with the gearwheel driving the Sled. This applies, AFAIK, to any make or model of CD player using the SANYO SFP mechanism.Try asking them directly via their customer services facility on the website Customer support dont mention its for modification.For a start I dont know why they insist on the serial number, when they have the model no., plus a description and part numbers for the parts required. Remote, used Cambridge Audio Azur 340CS CD player, box, remote, manual, for a steal. I purchased this new almost a year ago from an authorized dealer, and it has served me well. I used this for a second sy. 199.00 Sorry, this listing has ended. I purchased this new almost a year ago from an authorized dealer, and it has served me well. I used this for a second system, and it only has approximately 300 hours of playing time. This unit delivers genuinely good sound, which was a real eye ear opener for me, because you wouldn't expect this kind of performance from a unit which is fairly modest. And at this price point, you are getting some real bang for the buck. I have the original box, packing materials, manual, remote, all the stuff that came with the unit when I bought it new. It has the desirable Silver finish, and I've rated the unit overall at a "8"; it has a clean face and a clean top, and the unit has absolutely no issues. I'm selling because I am upgrading. This CD player is priced to sell, and I can have it ready to ship within 24 hours.I have been an Audiogon member for 10 years, 6 of those as a business. Learn more And if there's one thing we've learned in the past few years, it's that Cambridge Audios Azur range can be relied upon to offer uncommon value for money. Sturdy and smooth Out of the box and on your kit rack, the 340C looks and feels a fair bit more expensive than it is. Fundamentally, though, the 340C is a thoroughly engrossing musicmaker. Playing Neil Young's Silver and Gold, the Cambridge proffers a spirited, poised sound that's just the right side of strident. There's a degree of spaciousness in the 340C's presentation, too, making individual musical paths nice and easy to follow.

The rather more assertive Soul Desert by Can displays more of the Cambridge's strengths, as well as highlighting some slight weaknesses. It's an upfront listen, the 340C, and it powers through the dense tune with determination and fine dynamic heft, handling the tricky tempo with confidence. Inyerface performer In short, this is not a player for the fainthearted. The result is a slight but unwelcome hint of twodimensionality. The vast majority of the time, however, the Azur distinguishes itself as another in an illustrious line of profoundly impressive Cambridge Audio CD players. It's not going to dish as much detail as its rivals, but you're certainly not going to go short of excitement either. Please refresh the page and try again.
