Please get back Not sure that helps you other than saying that a service call is required, sorry;0 Good luck, John C Login to post There is no water entering the machine. When washing it stops after 1 min centrifuging and an E!! error appears. What should I do Candy Alise 1000 ES User Instructions Wash would work and motor would turn but it would not spin. Seems to be a problem with the speed sensor which I assume was on the control board and replacing the board fixed the problem. My question, is it possible to figure out what component on the board went bad and replace that resistor or cap or replay or whatever. The issue was just with spinning and seems to be because the control panel no longer knew what was going on with the speed of the motor, therefore it would not turn it when it needed to spin. Turning the motor to wash, or draining the washer was not the issue. Just the spinning. So it may just be a single component on the board that needs replacing. CANDY CNE109T mosogep bekapcsolas utan kb 5mpig mukodik. Sziasztok! A fent említett mosogepet kb 2 eve elraktak, most ujra hasznalni akartak, de nem indult. Akkor szivattyut csereltek benne, de mire megjött az alkatresz másik gepet szereztek. Kicsereltem a tapegysegben az 1,5uF-os kondenzatort 0,5uF volt, ami a tapot csinálja. Utána 34 bekapcsolásig kb 5 secig vizet eresztett azután csend, a következő bekapcsolási kísérletekre nemi vízeresztés után a dobot is megforgatja a szinten erre az időtartamra. Ami furcsa, a vízszint jelzője, belefúvasra egyik állásban kattan szepen, a következő fokozat nem kattan, de zár rendesen. de gondolom a gyors leállást nem ez okozza. Zoli.
