Open the printer driver dialog box and select the print mode best suited for the print job in the Choose Print Mode box under the Main tab. Also make sure that the BJ Cartridge and Media Type settings match the BJ cartridge and media currently set in the printer. Doubleclick the BJC2100 icon. If you see one or more print jobs queued for printing, select Purge Print Documents from the Printer menu. For details, see your Windows documentation or online Help. TroubleshootingMeaningless characters and symbols may print if you have selected the wrong printer driver for the print job. Before You Call for Help. Select Portrait to print across the width of the page and select Landscape to print across the length of the page. Open the printer driver dialog box and set the correct printing direction. TroubleshootingRefer to the printer driver online help for more details. Refer to the printer driver online help for more details. Opening the Printer Properties Dialog Box Changing the Page Setup Dialog Box Settings. If the setting is not correct, click the downarrow and select the correct media from the pulldown list. The Media Type setting must match the media loaded in the printer for the print job. Windows MacintoshRefer to the printer driver online help for more details. TroubleshootingSet the same Page Size setting for the application program and the printer driver. Open the Printer to the documentation of your application program. If the protective tape or cap has been reattached, remove it. Install the BJ cartridge in the printer and clean the print head immediately. After cleaning the print head, if printing is patchy or streaked replace the BJ cartridge. TroubleshootingReplacing the BJ Cartridge CHECK 2 IS PRINT QUALITYMacintoshIn the Quality panel, drag the slide bar to the right to select Fine. I Printed Pages Curled. As printed pages are ejected from the printer, they are curled or wavy.

A lower intensity setting uses less ink thus preventing curling of the printed page. WindowsPrintouts may be stained by excess ink inside of the printer. Cleaning the Printer CHECK 2 IS. In the printer driver, set Print Quality to Fine. The Fine setting reduces the tendency for ink to spread in printing color documents that require large amounts of ink, and reduces the tendency for ink to spread where black areas are adjacent to colored areas. WindowsCleaning the Print Head CHECK 4 ISIf you execute a high density print job on plain paper, the paper may absorb too much ink and curl, and the print head may scratch the surface of the curled page. Lower the Intensity setting. WindowsNote. If the Nozzle Check Pattern prints normally, there may be a problem in the application program. For details, refer to the documentation of your application program.This reduces uneven coloration you may see in a document where a large amount of ink is used. WindowsWindowsClick the Advanced button in the Main tab. In the Halftoning box under the Quality tab, disable Auto if it is checked and enabled. Click Diffusion and click the OK button. MacintoshA loose connection can cause losing part of a print job. TroubleshootingYou may not be able to print correctly with a WPS Windows Printing System driver installed in your system.Gradation appears streaked.In the printer driver, you can adjust the color tones of the image by changing the density of each color cyan, magenta, yellow and black. For example, you can lower the magenta setting when the reds are too dark or raise the cyan setting when the blues are too light. When using Manual for Printing, click the Details button. Click the Color panel. Move the slide bars of the individual colors to the left or right.MacintoshWhen using Manual for printing, click the Details button. Select the Color panel. Specify the Matching Method

setting. If Output Style is grayed out and cannot be used, check Matching Method in the checkbox.

If the other device operates normally, the power outlet is functioning normally. If you perform these checks and the problem is not solved, unplug the printer and contact the Canon Customer Care Center. Before You Call for Help Getting Help From Canon. TroubleshootingA faulty or loose connection can prevent it from starting. Checking the Printer and Computer Connection. If BJC2100 does not appear in the list, you must install the printer driver.Click the Details tab and select LPT1 or USBPRNnn in the Print to the following port box LPT1 Canon BJ LPT Printer Port. Opening the Printer Properties Dialog Box. TroubleshootingPrinting a Nozzle Check Pattern Cleaning the Print Head If the problem is not solved, replace the ink tank or the BJ cartridge.When this happens, the cartridge holder stops moving to protect the print head. Wait about 15 minutes for the print head to cool. If the reinstalled cartridge holder still does not return to the starting position, install another BJ cartridge. Replacing the BJ Cartridge If the problem still persists, there may be a fault in the printer. Contact the Canon Customer Care Center. Getting Help From Canon. Replace the printer cable and try again. On the Windows desktop, click the Start button, point to Settings, and click Printers. When the Printer window opens, click the BJC2100 icon to highlight it. Select Set As Default from the File menu. Select Chooser from the Apple menu. Select BJC2100. Paper Does Not Feed From Auto Sheet Feeder Envelopes Do Not Feed Paper Skewing During Feeding Multiple Sheets Feed Together Paper Jam.
