Targeted students, and those on a budget.,, Great camera for learners, especially when used fully manual. Aperture priority helps when getting that decisive shot.,, Camera does not have auto focus, but neither did most of the FDera cameras. again with another issue. So far my attempts at low light. I recently bought Top Shot for my friend and Im doing a test roll, b. Why post in this p. Came with a battery. Rewo. I mean most features are pretty self explanatory. Im just wondering if anyone has this model and does anyone know how to turn the date stamp feature off. Id hate to shoot a few rolls before finding out that I have a gaudy date stamped in front of every print. Thanks. That indicates the stamp is turned off. If yours has a mode button you might try that. Good luck and I am hope this has helped a little bit. PhilI have a mode button but its different than in all those manuals.

Im hoping that means the date stamp is off and the dashes wont appear on the negs. Funny thing is once I program a date into it, I cant get the dashed lines to appear at all. Oh well. Im going to assume the dashed lines mean date stamp is off and go for it. I could always photoshop them out. Just finished developing a roll and all is well. I have to say, its a pretty damn good camera. Sharpness of the lens surprised me. Mine has given me good results, too. If you want NextDay, we can save the other items for later.
