0 out of 5 stars All of the makeup colors in this book look the same. I have never even heard of some of the colors. She is mixing both cool and warm colors on a deep person, when everything I have read clearly states that a deep person should wear cool colors. I was a deep person when I was younger. Sometimes as you age, your color changes. Many years ago when there were just four seasons, I purchased a book by Carol Jackson who is the original creator of Color Me Beautiful. It was called CMB Makeup Book. It was fabulous. This book is good for a beginner who needs to learn how to apply makeup. I would not purchase it for any other reason. Easy reading and I was able to teach a eye class based on the information. There colors reflect their makeup line which is sold in Britian, Henderson the spelling of colour. Thought this was a great book with advanced makeup techniques like contouring and highlighting. Great pics! Liked the application showing barely there, daytime, evening and glamour for the different sub types. The limited 4 Seasons is from 30 years ago and the American Company is just not up to date. Lately the industry has gone from 12 to 16 harmonies of Seasons. Color analysis has progressed and this is a great British book for your arsonal of resources. I loved it! Havent read the whole book, so cant give a better review. But it should be a good tool book for mature ladies. Sorry, we failed to record your vote. Daisydee 4.0 out of 5 stars Now, looking over it again, I am "Autumn", but haven't been convinced those are the only colors to wear. fun to read, dated of course, but I like to have it around for reference on occasion! Yes, it is from the 80s so the pictures are out of date I personally love the 80s so this doesn't bother me one bit, but the information is timeless. Definitely an excellent reference for anyone who applies seasonal color analysis. Includes clothing colors as well as comprehensive makeup lists, skin care advice, and more. I also own the original Color Me Beautiful book. If you don't already know what your season is you should get both books. Years later, I wanted to find my colors again, so I got the makeup book. After reviewing the book, I remembered how I could never decide what I was, summer or winter. I have decided that the cool colors are best, so I made some progress, and am probably most safe with summer colors. There are tests to determine which season is best, if you cannot decide between two. There are 4 seasons For me I found it was best to decide by process of elimination. The rest of the book seemed to be a lot of non-essential filler, like how to apply makeup, and hair and clothes styles.

So for the low price of a used book, I got more information than I needed. Truth never goes out of style. Anyone who wants to look and feel their best, should adhere to these principles! She thought it was as good as I did! Would I buy another, for a friend or family member. That being said, it's great for someone just starting to use a little makeup, etc. A bit old fashioned at times, but the basic principles are the same. Plus, it only cost 10p. I have Carole Jackson's original Color Me Beautiful book, and I still get it out and have a look at it. This one will probably be the same. Sorry, we failed to record your vote. Please try again. Not only that, it has become a capitalist industry propagating via the Internet, a rather ironic development since part of the original This book is of the recent past period that people always spurn the most viciously. In this case, awful, AWFUL pictures of middle American women wearing hideous clothes, hideous hair and makeup. I didnt say hideous makeup because it would be redundant. Not only that, it has become a capitalist industry propagating via the Internet, a rather ironic development since part of the original message was to spend less. But one of the commentators on the dissing thread caught my attention for his rather patronising attitude that it was a cheap con to get the gullible. That really jarred with me. I dont know many dumb women. The women I know who wear makeup, get their bodies changed, spend fortunes on perfume and a gadzillion other things I disapprove of are scientists and doctors and teachers and lawyers and politicians and diplomats and options traders and world champions of this or that. They couldnt be a less gullible group. None of them are conned into the stuff they do. I was introduced to this book by an artist, as it happens, a strongwilled person, if ever there was one, who has always led her own life. You go to her house and she will show you things of glory she has made, the glory of which is embedded in the colours. She understands colour. I didnt and probably still dont. You have to read this book, she said. Know your colours. I love the openmindedness of MaryAnne. If she judged this book by its cover, or by the photos in it, she would have put it back on the shelf and wiped her hands afterwards. But she judged the book by what it said. If it wasnt the first book to talk about this, it was at least the first to make the ideas accessible to the world at large. These days youd say it went viral, I guess. MaryAnne used to buy ever copy she could find to give all her friends it is how I got my copy.

Colour affects my mood and needless to say, the colour I carry around on me all day is going to have that effect. Colour is an extension of me. Without knowing the science of it, I am aware that some colours make me feel good and some colours make me feel bad. To have some explanation of this was a liberating experience, as knowledge so often is. The book may have been a simplistic generalisation, but gee it was good, the core of it. Nothing brings that home to me like thinking of Genia. Every now and then I knit something in a colour I shouldnt wear. I know when Im knitting it that I shouldnt be. But I finish it and put it on. Genia is a Siberian who has never heard of Colour Me Beautiful. Every time, however, she sees me in something I shouldnt be wearing, something that breaks my season colours, she scolds me. The correlation is 100% and that is for the obvious, simple reason that the book works. Only a teensy bit, really. My mom and I have talked about this book for

years. Its a light and fluffy topic, but its loads of fun to us. I wasnt going to read this for style advice. I know what looks good on me i.e., black and I like what I like. Either way I figured I might as well read it all. Cue my existential crisis. All my life I thought I was a Winter, but nevermore. Having a warm undertone apparently means Im an Autumn. I know what looks good on me i.e., black and I like what I like. Either way I figured I might as well read it all. Cue my existential crisis. All my life I thought I was a Winter, but nevermore. Having a warm undertone apparently means Im an Autumn. Being an Autumn means Id look good in orange. I hate orange with all the hate anyone can have in their heart. It looks like sick. And its not just orange, but all the Autumn colours. Fuchsias look great on me, but being an Autumn means they dont.

Apparently I cant pull off black and true white because Im an Autumn. Whilst I have a warm undertone and the Autumn traits all apply to me, I look best wearing Winter colours. Im flummoxed. Am I a Winter or an Autumn. This book didnt answered all my questions, but it was fun to read. In the end, I think it boils down to common sense. This definitely isnt accurate for me, but its still fun to talk about. They left their color analysis appointment with little swatch booklets that they could take on their numerous shopping trips. Now, Im seeing the light too. My sons little girlfriend even had fun when we found the colors that suit her little 15 yearold Autumn self. This book even has neat color pages for each season. I know I am driving my poor husband insane with this book, following him around, wanting to figure out his colors. He just runs away in his black tshirt. I think hes hiding under the bed. Sigh. I disagreed with it and today proudly sport black, red, and purple with my red hair. They came out a wee bit darker in the printing which suits your color better. I am that season so i know. They came out a wee bit darker in the printing which suits your color better. I am that season so i know. I also like that the makeup swatches go by season and not just one companies brand in the season. The items that i realized i always looked and great in had blue undertones. The ones that were off had yellow. The items that i realized i always looked and great in had blue undertones. The ones that were off had yellow. I still follow the basics. I am a summer and love it! Carole describes in her book that each woman has her own season out of the four, and each season has its own colors. While I was reading, I came with the notsos. These color palettes are named like, and similar to the seasons; winter, summer, autumn, and spring. Carole describes in her book that each woman has her own season out of the four, and each season has its own colors.

While I was reading, I came with the notsosure conclusion if I am a winter medium olive skin, brown hair, mediumdark brown eyes. Though, after using the palette more, I starting adapting to the colors and started finding more outfits to wear than ever. I do recommend this book as a for every woman who is struggling with clothing, fashion, makeup, or color matching. Even though it is a bit outdated, it can still be adapted and is a good starting point. I know I read this one years ago when it seemed like everyone was doing their colors. It would be great if youve already got some sense of your skin tone and other attributes, but I find myself puzzling now as then over if Im a pale Winter or Autumn or maybe a Spring. I look at the colors and think well I look good in this shade, but not that. Heavy sigh. I am fashionchallenged. This book will not change that. Im just hoping to retire soon and maybe jus I know I read this one years ago when it seemed like everyone was doing their colors. Im just hoping to retire soon and maybe just live my life in jeans. Then I wont need to dress nicely for work. This is why my pants are all black, navy or grey. It makes dressing for the day simpler. The color combinations make a lot of sense. Its dated but the color matches arent really something that goes out of style. The month stuff is a bit confusing and I do suspect many people are a mixture more than the book allows and wish there were easier ways of

telling this part could stand to be updated. The color combinations make a lot of sense. It's dated but the color matches aren't really something that goes out of style.

The month stuff is a bit confusing and I do suspect many people are a mixture more than the book allows and wish there were easier ways of telling this part could stand to be updated! And you've got to love that 80s styling. Lots of makeup under harsh lights yes! There is a reason I look better in cool colors, a reason why brown makes me look drab but works for other people, and why gold jewelry looks dull for me. If you've ever wondered similar things about yourself, or feel lost trying to pick out clothes that look good for you, I recommend this. I honestly like the fact that it's never been updated since its original publishing in 1980. The examples are dated, plus I don't know many people who wear rouge anymore, but the rules to live by never change. It reads like easy guidelines to follow, without the trendiness of today to muddle it. Her emphasis was on the beauty confidence and clothes more than any makeup. Why so much disgruntled judgment regarding this book.

Read this as a tool for self-awareness, consideration for personal style, and if you are determined to insist on your presentism expertise an artifact of its time, but be sure to use your consider the challenges and triumphs in which it was set. I did get kind of confused with all the colors in the book, so I'm really glad I got my personalized color wheel and didn't rely on the book. I did I did get kind of confused with all the colors in the book, so I'm really glad I got my personalized color wheel and didn't rely on the book. I did enjoy the second part of the book which talks about figuring out your body type and face shape. I hadn't seen that information before and it was interesting. There were also a lot of tips on organizing your wardrobe and planning your wardrobe. I carry the color swatches with me when I go shopping, and it helps avoid a lot of mistakes. The author is a winter, and provides plenty of advice for all color seasons, which is great in a field that seems to be dominated by Autumn's recommending colors like rust, mustard, and olive which look terrible on me. The author is perhaps a bit too unforgiving when it comes to the wearing of black for non-Winters. I do try to keep it away from my face, but the usefulness of black trousers, shoes, and bags is hard to resist. In addition, anyone in classical music is likely to need at least one all-black outfit for concerts, which is just unavoidable. It categorizes each person into a season as we have all heard based on the undertones of our skin.

The author states that our season would never change even if we change our hair color because our undertones of our skin stay the same. I don't agree with this. If you are normally a blue-eyed blonde but you dye your hair black and put in dark brown contacts, I think that will affect what colors look. good on you. I also think that for many caucasians, our skin tends to get paler as we get older and we lose undertones. So naturally, our what colors we would wear may change. But as a general guide its ok. It was a quick read especially since I skipped 2 chapters. Those chapters were how to dress for style. Since it isn't 1973 anymore, they weren't applicable to 2020 standards. Since I've stopped highlighting my hair it's been difficult for me to figure out which colors work best for me. I think this book and its message must seem dated to young women, who have their own set of rules for what looks best on them.

Color theory is an interesting idea for design in general how we furnish and decorate our homes. This concept was very popular when I was doing both, building a professional wardrobe and furnishing a house. I highly recommend this book. Understanding what colours are more suited for you is not only a great ego boost but it will also make a great impact on the people you deal with. I highly recommend this book. Understanding what colours are more suited for you is not only a great ego boost but it will also make a great impact on the people you deal with. Once I experienced the "wow" factor with certain colours, I was hooked. Buying the book afterwards was a natural follow up. People are shocked that I still carry around the original palette, tattered though it may be. The idea may seem dated and constricting but I think it works. Not helpful to someone who is hates they colors their season has to wear though. Probably wont reference again. I read this because so many other books referenced it. There is some good information in it, but it is dated. There are better options if you are interested I this subject. Has some merit. Way to start with. I prefer to be more creative, to mix crazy colors in makeup look but I have to know basics anyway. I knew if I wore black or white I would always get compliments I just did not know why, now I do. There are no discussion topics on this book yet. Once you discover your season you will know the perfect colors for your clothes, makeup, accessories and even hair color. Are you a SPRING, SUMMER, AUTUMN, or WINTER You can shop with your colors on your phone, but most people like to have colors printed to see them all at once or to accompany the Color Me Beautiful book on Kindle. Autumns come to life in the rich, warm tones of fall, and the Spring woman's coloring is most enhanced by clear, warm colors, like the budding growth and fresh fruit tones of springtime.

When you wear your special colors, you are indeed the fairest of them all. It happens automatically! Every purchase is a winner when you shop with your colors. Autumn women look luxuriously beautiful in earth tones of Gold, Burnt Red, Rust, Olive, Sage — all the color of autumn leaves.
